

VR 360 Virtual Campus Tour

VR 360 Virtual Campus Tour

Visiting NYCU's cutting-edge technology laboratories remotely

The [VR 360 Virtual Campus Tour](#) website (VR 360) offers remote guided tours through web browsing, allowing non-campus users to explore the university's campus and highlight laboratories without physically visiting the campus. Through the presentation of high-resolution 360 panoramic photos, [VR 360](#) provides users with an immersive experience. It not only allows users to get to know the university in-depth but also enables them to choose their preferred experience mode. The [VR 360](#) website has a five-layer architecture, guiding users hierarchically from an overview to specific areas (Survey to Landmark). It also provides interactive in-depth equipment or space descriptions. This immersive experience helps users explore the university's key features and achievements, promoting a positive impression of the university and enhancing its reputation.
