摘要

我們用 ab initio self-consistent 方法計算出每一個原子的基態電子密度,然後再利用基態電子密度得出原子的基態總能.我們利用基態電子密度為基礎,構造出原子中每個電子組態的波函數所相對應的虛波函數,最後求得虛波函數的虛位勢.

Ab Initio Computation for Atomic Pseudopotential

ABSTRACT

We calculate the ground-state electronic density of each atom by using ab initio self-consistent method, and then we obtain the total ground state energy of atoms from using the ground-state electronic density of each atom. We can use the ground-state electronic density of each atom to construct the pseudo wave function which corresponds to the wave function of valence states. In the end, we can obtain the pseudopotential of the pseudo wave function for each angular momentum.

誌 謝

非常感謝我的指導教授,對於我研究上的問題,不厭其煩的為我解答,陪我一起成長,無以回報,並且謝謝各位口試委員的指導,還要感謝陪我一起奮鬥的同學,在遇到困難或灰心的時候,給我鼓勵和支持,我的家人也是對我不遺餘力的支持,如果沒有這些幫助我的人,我也不能順利的完成學業,對此,我感恩於心。
