

## Figure Captions

### **Chapter 2**

|            |  |    |
|------------|--|----|
| Figure 2-1 | TDS of the plastic substrate.....  | 36 |
| Figure 2-2 | picture of the different sample immersed in acetone.   | 37 |
| Figure 2-3 | Comparison of weight loss among PES substrates with/without SiN hardcoating, after different thermal annealing (at 150oC and 200oC)..... | 38 |
| Figure 2-4 | SiN Hard Coating Layer.....  | 39 |
| Figure 2-5 | samples with different thickness of hard coating.....  | 40 |
| Figure 2-6 | Comparison of Transmittance.....   | 41 |
| Figure 2-7 | picture of the plastic with high-K dielectric hard coating.....  | 42 |
| Figure 2-8 | picture of the device fabricated on the Al <sub>2</sub> O <sub>3</sub> hard coating.....   | 43 |

### **Chapter 3**

|             |  |    |
|-------------|--|----|
| Figure 3-1  | Schematic cross sectional view of the simple FET... device   | 44 |
| Figure 3-2  | the transfer characteristic and the output characteristic of the amorphous TFT with SiH <sub>4</sub> /H <sub>2</sub> ration is 1/10..... | 45 |
| Figure 3-3  | The transfer characteristic and the output characteristic of the amorphous TFT with SiH <sub>4</sub> /H <sub>2</sub> ration is 1/49..... | 46 |
| Figure 3-4  | FTIR absorption spectra for SiON film.....   | 47 |
| Figure 3-5  | I-V measurement for the SiON film.....   | 47 |
| Figure 3-6  | C-V measurement for TiO <sub>2</sub> film.....   | 48 |
| Figure 3-7  | I-V measurement for TiO <sub>2</sub> film.....   | 48 |
| Figure 3-8  | C-V measurement for Al <sub>2</sub> O <sub>3</sub> film.....   | 49 |
| Figure 3-9  | I-V measurement for Al <sub>2</sub> O <sub>3</sub> film.....   | 49 |
| Figure 3-10 | Schematic cross sectional view of devices with conventional bottom gate structure.....   | 50 |
| Figure 3-11 | TFT device was fabricated on the different kinds of substrate.....   | 51 |

|                      |  |    |
|----------------------|--|----|
| Figure 3-12          | depicts the output ( $I_D$ - $V_D$ ) characteristics and the transfer ( $I_D$ - $V_G$ ) characteristics of the TFT which was fabricated on the silicon substrate.....                          | 52 |
| Figure 3-13          | I-V characteristics of TFT devices with SiON gate dielectric on the SiCN coated plastic substrate.<br>( $W/L=50 \mu\text{ m}/50 \mu\text{ m}$ ).....   | 53 |
| Figure 3-14          | I-V characteristics of TFT devices with SiON gate dielectric on the SiCN coated plastic substrate.<br>( $W/L=50 \mu\text{ m}/10 \mu\text{ m}$ ).....   | 54 |
| Figure 3-15          | I-V characteristics of TFT devices with SiON gate dielectric on the SiCN/SiN coated plastic substrate.<br>( $W/L=50 \mu\text{ m}/50 \mu\text{ m}$ ).....                                       | 55 |
| Figure 3-16          | I-V characteristics of TFT devices with SiON gate dielectric on the SiCN/SiN coated plastic substrate.<br>( $W/L=50 \mu\text{ m}/10 \mu\text{ m}$ ).....                                       | 56 |
| Figure 3-17          | I-V characteristics of TFT devices with SiON gate dielectric fabricated on the TiO <sub>2</sub> (800A) hard coating on the plastic substrate<br>( $W/L=50 \mu\text{ m}/50 \mu\text{ m}$ )..... | 57 |
| Figure 3-18          | I-V characteristics of TFT devices with SiON gate dielectric fabricated on the TiO <sub>2</sub> (800A) hard coating on the plastic substrate<br>( $W/L=50 \mu\text{ m}/10 \mu\text{ m}$ )..... | 58 |
| Figure 3-19          | picture of the TFT device with the TiO <sub>2</sub> and thin SiON being the gate dielectric.....   | 59 |
| <br><b>Chapter 4</b> |  |    |
| Figure 4-1           | Cross section of different structure.....  | 60 |
| Figure 4-2           | The performance of the P3HT film under different kinds of treatment.....   | 60 |

|  |    |
|--|----|
| Figure 4-3 The performance of the P3HT film under different kinds of treatment (HMDS, OTS and TMS).....                        | 61 |
| Figure 4-4 I-V characteristics of OTFT devices with bottom contact structure (no treatment).....                               | 62 |
| Figure 4-5 I-V characteristics of OTFT devices with bottom contact structure (the simple cleaning treatment).....              | 63 |
| Figure 4-6 I-V characteristics of OTFT devices with bottom contact structure (the oxygen plasma treatment).....                | 64 |
| Figure 4-7 I-V characteristics of OTFT devices with bottom contact structure (the HMDS plasma treatment and P3HT spin).....    | 65 |
| Figure 4-8 I-V characteristics of OTFT devices with bottom contact structure (the OTS plasma treatment and P3HT spin).....     | 66 |
| Figure 4-9 I-V characteristics of OTFT devices with bottom contact structure (the OTS plasma treatment and P3HT casting).....  | 67 |
| Figure 4-10 I-V characteristics of OTFT devices with bottom contact structure (the TMS plasma treatment and P3HT spin).....    | 68 |
| Figure 4-11 I-V characteristics of OTFT devices with bottom contact structure (the TMS plasma treatment and P3HT casting)..... | 69 |
| Figure 4-12 I-V characteristics of OTFT devices with Top contact structure (the HMDS plasma treatment and P3HT spin).....      | 70 |
| Figure 4-13 I-V characteristics of OTFT devices with Top contact structure (the HMDS plasma treatment and P3HT casting).....   | 71 |
| Figure 4-14 I-V characteristics of OTFT devices with Top contact structure (the OTS plasma treatment and P3HT casting).....    | 72 |
