

Acknowledgement

Many people assisted in supporting this thesis. This thesis would not be accomplished without them.

First, I would like to thank my advisor, Prof. Wei Hwang, for his good advice, judicious suggestion, and complete support.

Next, I would like to thank all the partners at the LPSOC Lab.. They provide a beneficial place to study and research.

Finally, I would like to thank my family. They are fully behind my graduate study, and encourage me everywhere. Thank you all.
