<b>ABSTRACT (English)</b> .....	<b>III</b>
<b>ACKNOWLEDGEMENT</b> .....	<b>V</b>
<b>CONTENTS</b> .....	<b>VI</b>
<b>LIST OF TABLES</b> .....	<b>XI</b>
<b>LIST OF FIGURES</b> .....	<b>XVI</b>
<b>CHAPTER 1 INTRODUCTION</b> .....	<b>1</b>
<b>1.1 Background And Motivation</b> .....	<b>1</b>
<b>1.2 Statement Of The Problems</b> .....	<b>5</b>
<b>1.3 Research Project</b> .....	<b>8</b>
<b>1.4 Objectives</b> .....	<b>11</b>
<b>1.5 Dissertation Layout</b> .....	<b>13</b>
<b>CHAPTER 2 LITERATURE REVIEW ON DAMAGE DETECTION AND HEALTH MONITORING TECHNIQUES</b> .....	<b>15</b>
<b>2.1 Introduction</b> .....	<b>15</b>
<b>2.2 Modal-Based Damage Detection And Health Monitoring</b> .....	<b>15</b>
2.2.1 Methods for Detection of Structural Damage Location .....	<b>17</b>
2.2.2 Methods for Estimation of Damage Extent .....	<b>19</b>
<b>2.3 Neural-Networks-Based Approaches</b> .....	<b>20</b>
2.3.1 Neural Networks for System Identification .....	<b>20</b>
2.3.2 Neural Networks for Structural Health Monitoring .....	<b>22</b>

<b>CHAPTER 3</b>	<b>ARTIFICIAL NEURAL NETWORKS</b>	<b>25</b>
3.1	Introduction	25
3.2	Supervised Neural Network With L-BFGS Learning Algorithm	27
3.2.1	Backpropagation Network (BPN)	27
3.2.2	L-BFGS Learning Algorithm	31
3.3	Unsupervised Fuzzy Neural Network Reasoning Model	32
3.3.1	Similarity Measurement	33
3.3.2	Fuzzy Set Generation	35
3.3.3	Solution Synthesis	35
<b>CHAPTER 4</b>	<b>ANN APPROACH FOR SYSTEM IDENTIFICATION OF STRUCTURES</b>	<b>37</b>
4.1	Introduction	37
4.2	General View On Application Of ANN In System Identification	38
4.3	ANNSI Model For Modal Analysis	41
4.3.1	Construction of Modal Analysis Network (MAN) for a Linear Dynamic System	42
4.3.2	Estimation of Modal Parameters	46
4.3.3	Example - Modal Analysis of a Five-Story Steel Frame in NCREE	49
4.4	Identification Of Strain Mode Shapes	57
4.4.1	Equation of Strain Motion of a system	57
4.4.2	Relationship between Strain and Displacement Modal Parameters	59
4.5	System Monitoring Networks	62
4.5.1	Global Monitoring Networks	63
4.5.2	Decentralized Monitoring Networks	65

4.5.3	Example 1 - Health Monitoring of a Five-Story Steel Frame Using Global Monitoring Networks .....	69
4.5.4	Example 2 - Damage Detection of a Six-Story Steel Frame Using Decentralized Monitoring Networks .....	71

**CHAPTER 5 DAMAGE DIAGNOSIS OF STRUCTURES  
VIA NEURAL NETWORKS ..... 79**

<b>5.1</b>	<b>Introduction .....</b>	<b>79</b>
<b>5.2</b>	<b>Damage Detection By Using The UFN Model .....</b>	<b>80</b>
5.2.1	Index for Damage Localization .....	81
5.2.2	UFN for the Damage Detection of Structures .....	84
5.2.3	Input-/Output Patterns for the Neural Network .....	87
5.2.4	Example - Damage Detection of a Five-Story Steel Frame .....	87
<b>5.3</b>	<b>Estimation Of Damage Extent .....</b>	<b>107</b>
5.3.1	Algorithms for the estimation of damage extent .....	107
5.3.2	Example - Damage Extent Assessment of a Five-Story Shear Frame .....	110

**CHAPTER 6 SETUP FOR THE EXPERIMENTAL STUDY ... 117**

<b>6.1</b>	<b>Introduction .....</b>	<b>117</b>
<b>6.2</b>	<b>Shaking Table And Experimental Specimen .....</b>	<b>120</b>
6.2.1	The Shaking Table in NCTU .....	120
6.2.2	Four-Story Steel Test Model .....	122
<b>6.3</b>	<b>Sensing Instrumentations .....</b>	<b>126</b>
6.3.1	Accelerometers .....	127
6.3.2	FBG Sensors and RSGs .....	130
<b>6.4</b>	<b>Deterioration Simulation .....</b>	<b>143</b>

6.4.1	Strengthening Column .....	144
6.4.2	Simulated Deterioration Cases .....	148
<b>6.5</b>	<b>Experimental Scheme .....</b>	<b>148</b>
<b>6.6</b>	<b>Pre-Analysis Of The Measured Data .....</b>	<b>151</b>
6.6.1	Acceleration Records and Their Fourier Spectra .....	151
6.6.2	Measurements from the FBG Sensors and RSGs .....	161
<b>CHAPTER 7</b>	<b>HEALTH MONITORING ON THE TEST</b>	
	<b>FRAME .....</b>	<b>175</b>
<b>7.1</b>	<b>Introduction .....</b>	<b>175</b>
<b>7.2</b>	<b>Modal Analysis Using The ANNSI Model .....</b>	<b>176</b>
7.2.1	Modal Data of the Specimen Extracted from the Acceleration Measurements .....	176
7.2.2	Modal Data of the Specimen Extracted from the RSGs Measurements .....	194
7.2.3	Modal Data of the Specimen Extracted from the FBG Sensors Measurements .....	203
<b>7.3</b>	<b>Damage Detection With The Displacement-Based Modal Data .....</b>	<b>217</b>
7.3.1	Damage Indicators from the Displacement-Based Modal Data .....	218
7.3.2	Monitoring of Degradation Development in Story Stiffness Based on the Modal Data .....	222
<b>7.4</b>	<b>Damage Detection With The Strain-Based Modal Data .....</b>	<b>224</b>
7.4.1	Extraction of the Damage Indicators .....	224
7.4.2	Damage Indicators Obtained from the RSGs Measurements .....	225
7.4.3	Damage Indicator Obtained from the FBG sensors Measurements .....	229
7.4.4	Further Discussions on the FBG Sensors and RSGs .....	234

<b>7.5</b>	<b>Damage Detection With The Monitoring Networks</b>	<b>235</b>
7.5.1	Health Monitoring Using Global Monitoring Networks	235
7.5.2	Health Monitoring Using Decentralized Monitoring Networks	240
<b>CHAPTER 8</b>	<b>HEALTH MONITORING SYSTEM FOR THE STRUCTURAL MONITORING AND DAMAGE DIAGNOSIS</b>	<b>251</b>
8.1	Introduction	251
8.2	An Integrated System For Structural Health Monitoring	254
<b>CHAPTER 9</b>	<b>CONCLUDING REMARKS</b>	<b>259</b>
9.1	Summary	259
9.1.1	Analytical Study	259
9.1.2	Experimental Study	263
9.1.3	Integrated Structural Health Monitoring System	265
9.2	Recommendations On Future Research	265

# LIST OF TABLES

## CHAPTER 4

Table 4.1	Identified modal parameters for 8% Kobe earthquake input .....	55
Table 4.2	Identified modal parameters for different inputs .....	56
Table 4.3	Damage cases under discussion .....	72
Table 4.4	The conditions of predicted output error for each network due to the occurrence of damage .....	74

## CHAPTER 5

Table 5.1	Characterizations of simulated damage cases .....	88
Table 5.2	Characterizations of the testing instances .....	97
Table 5.3	Diagnostic results via UFN (without noise) .....	99
Table 5.4	Diagnostic results via UFN (with various noise levels) .....	102
Table 5.5	Diagnostic results of using incomplete modal data via UFN .....	104
Table 5.6	Diagnostic results via BPN .....	106
Table 5.7	Estimation of the damage extent based on the localization results in Table 5.3 .....	112
Table 5.8	Estimation of the damage extent based on the use of noise-polluted mode shapes and the localization results in Table 5.4 .....	113

## CHAPTER 6

Table 6.1	Specifications of the shaking table in NCTU .....	121
Table 6.2	The characterizations of the experimental specimen .....	123
Table 6.3	Analytic modal parameters of the test model in the transverse direction .....	124
Table 6.4	Specifications of the accelerometers .....	127
Table 6.5	Specifications of the FBG-SLI .....	136
Table 6.6	Center wavelength of the FBG sensors along Channel 1 .....	139

Table 6.7	Center wavelength of the FBG sensors along Channel 2 .....	139
Table 6.8	Dimension of the SCs .....	146
Table 6.9	Characterizations of the simulated deterioration cases .....	149
Table 6.10	Operation sequence of the shaking table test .....	150
Table 6.11	Statistical summaries of the acceleration records .....	153
Table 6.12	Statistical summaries of the strain records from the FBG sensors at BE .....	163
Table 6.13	Statistical summaries of the strain records from the FBG sensors at TE .....	165
Table 6.14	Statistical summaries of the strain records from the FBG sensors at BW .....	167
Table 6.15	Statistical summaries of the strain records from the RSGs .....	169

## CHAPTER 7

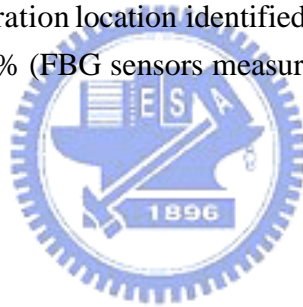

Table 7.1	Modal parameters of the test structure in healthy condition (AAA)...	179
Table 7.2	Modal parameters of <i>Dcase_BAA</i> .....	182
Table 7.3	Modal parameters of <i>Dcase_NAA</i> .....	182
Table 7.4	Modal parameters of <i>Dcase_ABA</i> .....	182
Table 7.5	Modal parameters of <i>Dcase_ANA</i> .....	183
Table 7.6	Modal parameters of <i>Dcase_AAB</i> .....	183
Table 7.7	Modal parameters of <i>Dcase_AAN</i> .....	183
Table 7.8	Modal parameters of <i>Dcase_BBA</i> .....	184
Table 7.9	Modal parameters of <i>Dcase_BNA</i> .....	184
Table 7.10	Modal parameters of <i>Dcase_NBA</i> .....	184
Table 7.11	Modal parameters of <i>Dcase_NNA</i> .....	185
Table 7.12	Modal parameters of <i>Dcase_BAB</i> .....	185
Table 7.13	Modal parameters of <i>Dcase_BAN</i> .....	185
Table 7.14	Modal parameters of <i>Dcase_NAB</i> .....	186

Table 7.15	Modal parameters of <i>Dcase_NAN</i> .....	186
Table 7.16	Modal parameters of <i>Dcase_ABB</i> .....	186
Table 7.17	Modal parameters of <i>Dcase_ABN</i> .....	187
Table 7.18	Modal parameters of <i>Dcase_ANB</i> .....	187
Table 7.19	Modal parameters of <i>Dcase_ANN</i> .....	187
Table 7.20	Modal parameters of <i>Dcase_BBB</i> .....	188
Table 7.21	Modal parameters of <i>Dcase_BBN</i> .....	188
Table 7.22	Modal parameters of <i>Dcase_NBB</i> .....	188
Table 7.23	Modal parameters of <i>Dcase_BNN</i> .....	189
Table 7.24	Modal parameters of <i>Dcase_NNB</i> .....	189
Table 7.25	Modal parameters of <i>Dcase_NNN</i> .....	189
Table 7.26	Modal parameters of <i>Dcase_AAA</i> using RSGs measurements .....	195
Table 7.27	Modal parameters of <i>Dcase_BAA</i> using RSGs measurements .....	195
Table 7.28	Modal parameters of <i>Dcase_NAA</i> using RSGs measurements .....	195
Table 7.29	Modal parameters of <i>Dcase_ABA</i> using RSGs measurements .....	196
Table 7.30	Modal parameters of <i>Dcase_ANA</i> using RSGs measurements .....	196
Table 7.31	Modal parameters of <i>Dcase_AAB</i> using RSGs measurements .....	196
Table 7.32	Modal parameters of <i>Dcase_AAN</i> using RSGs measurements .....	197
Table 7.33	Modal parameters of <i>Dcase_BBA</i> using RSGs measurements .....	197
Table 7.34	Modal parameters of <i>Dcase_BNA</i> using RSGs measurements .....	197
Table 7.35	Modal parameters of <i>Dcase_NBA</i> using RSGs measurements .....	198
Table 7.36	Modal parameters of <i>Dcase_NNA</i> using RSGs measurements .....	198
Table 7.37	Modal parameters of <i>Dcase_BAB</i> using RSGs measurements .....	198
Table 7.38	Modal parameters of <i>Dcase_BAN</i> using RSGs measurements .....	199
Table 7.39	Modal parameters of <i>Dcase_NAB</i> using RSGs measurements .....	199
Table 7.40	Modal parameters of <i>Dcase_NAN</i> using RSGs measurements .....	199

Table 7.41	Modal parameters of <i>Dcase_ABB</i> using RSGs measurements .....	200
Table 7.42	Modal parameters of <i>Dcase_ABN</i> using RSGs measurements .....	200
Table 7.43	Modal parameters of <i>Dcase_ANB</i> using RSGs measurements .....	200
Table 7.44	Modal parameters of <i>Dcase_ANN</i> using RSGs measurements .....	201
Table 7.45	Modal parameters of <i>Dcase_BBB</i> using RSGs measurements .....	201
Table 7.46	Modal parameters of <i>Dcase_BBN</i> using RSGs measurements .....	201
Table 7.47	Modal parameters of <i>Dcase_NBB</i> using RSGs measurements .....	202
Table 7.48	Modal parameters of <i>Dcase_BNN</i> using RSGs measurements .....	202
Table 7.49	Modal parameters of <i>Dcase_NNB</i> using RSGs measurements .....	202
Table 7.50	Modal parameters of <i>Dcase_NNN</i> using RSGs measurements .....	203
Table 7.51	Modal parameters of <i>Dcase_AAA</i> using FBGs measurements .....	205
Table 7.52	Modal parameters of <i>Dcase_BAA</i> using FBGs measurements .....	205
Table 7.53	Modal parameters of <i>Dcase_NAA</i> using FBGs measurements .....	206
Table 7.54	Modal parameters of <i>Dcase_ABA</i> using FBGs measurements .....	206
Table 7.55	Modal parameters of <i>Dcase_ANA</i> using FBGs measurements .....	207
Table 7.56	Modal parameters of <i>Dcase_AAB</i> using FBGs measurements .....	207
Table 7.57	Modal parameters of <i>Dcase_AAN</i> using FBGs measurements .....	208
Table 7.58	Modal parameters of <i>Dcase_BBA</i> using FBGs measurements .....	208
Table 7.59	Modal parameters of <i>Dcase_BNA</i> using FBGs measurements .....	209
Table 7.60	Modal parameters of <i>Dcase_NBA</i> using FBGs measurements .....	209
Table 7.61	Modal parameters of <i>Dcase_NNA</i> using FBGs measurements .....	210
Table 7.62	Modal parameters of <i>Dcase_BAB</i> using FBGs measurements .....	210
Table 7.63	Modal parameters of <i>Dcase_BAN</i> using FBGs measurements .....	211
Table 7.64	Modal parameters of <i>Dcase_NAB</i> using FBGs measurements .....	211
Table 7.65	Modal parameters of <i>Dcase_NAN</i> using FBGs measurements .....	212
Table 7.66	Modal parameters of <i>Dcase_ABB</i> using FBGs measurements .....	212

Table 7.67	Modal parameters of <i>Dcase_ABN</i> using FBGs measurements .....	213
Table 7.68	Modal parameters of <i>Dcase_ANB</i> using FBGs measurements .....	213
Table 7.69	Modal parameters of <i>Dcase_ANN</i> using FBGs measurements .....	214
Table 7.70	Modal parameters of <i>Dcase_BBB</i> using FBGs measurements .....	214
Table 7.71	Modal parameters of <i>Dcase_BBN</i> using FBGs measurements .....	215
Table 7.72	Modal parameters of <i>Dcase_NBB</i> using FBGs measurements .....	215
Table 7.73	Modal parameters of <i>Dcase_BNN</i> using FBGs measurements .....	216
Table 7.74	Modal parameters of <i>Dcase_NNB</i> using FBGs measurements .....	216
Table 7.75	Modal parameters of <i>Dcase_NNN</i> using FBGs measurements .....	217
Table 7.76	Possible deterioration location identified by using the CSMS and with a threshold of -10% (RSG measurements) .....	226
Table 7.77	Possible deterioration location identified by using the CSMS and with a threshold of -10% (FBG sensors measurements) .....	233

# LIST OF FIGURES

## CHAPTER 1

Figure 1.1	Illustration of the relationship between system performance and health monitoring (including damage diagnosis) of a smart structure .....	3
Figure 1.2	Relationship between system identification and damage assessment techniques .....	5
Figure 1.3	The frame of the health monitoring system .....	12

## CHAPTER 3

Figure 3.1	Diagram of a neuron .....	26
Figure 3.2	A typical three-layer neural network .....	28
Figure 3.3	Process of the UFN reasoning .....	36

## CHAPTER 4

Figure 4.1	Identification network trained with feedback inputs .....	40
Figure 4.2	Identification network trained without feedback inputs .....	41
Figure 4.3	Topology of the modal analysis neural network .....	44
Figure 4.4	Operation procedure of the ANNSI model .....	48
Figure 4.5	A photo of the five-story steel frame in NCREE .....	50
Figure 4.6	Response histories for 8% Kobe earthquake input .....	52
Figure 4.7	Comparison between the measured (solid line) and predicted (dash line) responses for 8% Kobe earthquake input .....	53
Figure 4.8	Schematic diagram of health monitoring using neural networks .....	64
Figure 4.9	Relative mean absolute errors of predictions for the Kobe Earthquake inputs with various reduction levels .....	70
Figure 4.10	Model of a six-story shear frame structure .....	71
Figure 4.11	Topology of the neural network, $Net_1$ .....	73
Figure 4.12	Predicted $MAE$ for Case 1 .....	75

Figure 4.13	Predicted <i>MAE</i> for Case 2 .....	75
Figure 4.14	Predicted <i>MAE</i> for Case 3 .....	76
Figure 4.15	Predicted <i>MAE</i> for Case 4 .....	76
Figure 4.16	Predicted <i>MAE</i> for Case 5 .....	77

## CHAPTER 5

Figure 5.1	Plots of the DLF for the <i>Dam_k1</i> class with 20% damage extent ((a) to (e) are the plots of the DLF which are obtained by dividing the changes in the modal vector to the changes in the 1st to 5th modal values, respectively) .....	90
Figure 5.2	Plots of the DLF for the <i>Dam_k1</i> class with 26% damage extent ((a) to (e) are the plots of the DLF which are obtained by dividing the changes in the modal vector to the changes in the 1st to 5th modal values, respectively) .....	91
Figure 5.3	Plots of the DLF for the <i>Dam_k2</i> class with 20% damage extent ((a) to (e) are the plots of the DLF which are obtained by dividing the changes in the modal vector to the changes in the 1st to 5th modal values, respectively) .....	92
Figure 5.4	Plots of the DLF for the <i>Dam_k3</i> class with 20% damage extent ((a) to (e) are the plots of the DLF which are obtained by dividing the changes in the modal vector to the changes in the 1st to 5th modal values, respectively) .....	93
Figure 5.5	Plots of the DLF for the <i>Dam_k1&amp;k2</i> class with 20% damage extent ((a) to (e) are the plots of the DLF which are obtained by dividing the changes in the modal vector to the changes in the 1st to 5th modal values, respectively) .....	94
Figure 5.6	Plots of the DLF for the <i>Dam_k1&amp;k3</i> class with 20% damage extent ((a) to (e) are the plots of the DLF which are obtained by dividing the changes in the modal vector to the changes in the 1st to 5th modal values, respectively) .....	95
Figure 5.7	Estimations of the damage extent using noise-free modal data .....	114
Figure 5.8	Estimations of the damage extent using noise-polluted modal data...	115

## CHAPTER 6

Figure 6.1	Earthquake simulator- shaking table system in NCTU .....	121
Figure 6.2	Time-history and frequency spectrum of the 0.08g Kobe earthquake .....	122
Figure 6.3	Schematic diagrams of the four-story frame (unit: <i>mm</i> ) .....	124
Figure 6.4	Member cross section of the test model (unit: <i>mm</i> ) .....	125
Figure 6.5	A photo of the four-story clear frame .....	126
Figure 6.6	Displacement of the sensing instrumentations .....	128
Figure 6.7	Accelerometer at the 2nd floor of the test frame .....	129
Figure 6.8	Accelerometer at the base of the test frame .....	129
Figure 6.9	A schematic representation of a fiber Bragg grating (extracted from Othonos and Kalli, 1999) .....	131
Figure 6.10	Illustration of a fiber Bragg grating with strain effect .....	133
Figure 6.11	FBG data acquisition system .....	135
Figure 6.12	Block diagram of the optical layout (extracted from <i>FBG-SLI Instruction Manual, Version 4.0</i> ) .....	137
Figure 6.13	Configurations of the FBG sensors .....	139
Figure 6.14	Transmission and reflection spectra of Channel 1 .....	140
Figure 6.15	Transmission and reflection spectra of Channel 2 .....	141
Figure 6.16	Locations of the FBG1 and RSG1 .....	142
Figure 6.17	Location of the FBG2 .....	142
Figure 6.18	Location of the FBG9 .....	143
Figure 6.19	Schematic diagrams of the SC and its connection .....	146
Figure 6.20	Connection of the SC at the 1st story (left) and the 2nd floor (right) .....	147
Figure 6.21	A photo of the intact structure .....	147
Figure 6.22	Increments of maximum response for the single deteriorated site scenarios .....	155

Figure 6.23	Comparisons of the effectiveness between the SC-A and SC-B .....	156
Figure 6.24	Spectra of the AAA_acc record .....	157
Figure 6.25	Spectra of the deterioration class $Dclass_{k_1}$ .....	157
Figure 6.26	Spectra of the deterioration class $Dclass_{k_2}$ .....	158
Figure 6.27	Spectra of the deterioration class $Dclass_{k_3}$ .....	158
Figure 6.28	Spectra of the deterioration class $Dclass_{k_1 \& k_2}$ .....	159
Figure 6.29	Spectra of the deterioration class $Dclass_{k_1 \& k_3}$ .....	159
Figure 6.30	Spectra of the deterioration class $Dclass_{k_2 \& k_3}$ .....	160
Figure 6.31	Spectra of the deterioration class $Dclass_{k_1 \& k_2 \& k_3}$ .....	160
Figure 6.32	Strain time-history responses of the FBG sensors at BW for AAA ...	171
Figure 6.33	Strain time-history responses of the RSGs at BW for AAA .....	172
Figure 6.34	Strain time-history responses of the FBG sensors at TE for AAA ...	173
Figure 6.35	Strain time-history responses of the FBG sensors at BW for AAA ...	174
<b>CHAPTER 7</b>		
Figure 7.1	Response histories of the AAA_acc measurement .....	177
Figure 7.2	Comparison between the measured (solid line) and computed (dash line) responses for the AAA_acc measurement .....	178
Figure 7.3	Variations of natural frequency under different deteriorated cases ...	190
Figure 7.4	Variations of damping ratio under different deteriorated cases .....	191
Figure 7.5	Relative changes in natural frequencies .....	192
Figure 7.6	Relative changes in damping ratios .....	193
Figure 7.7	CMS for $Dclass_{k_1}$ .....	220
Figure 7.8	CMS for $Dclass_{k_2}$ .....	220
Figure 7.9	CMS for $Dclass_{k_3}$ .....	221
Figure 7.10	CMS for $Dclass_{k_1 \& k_2}$ .....	221
Figure 7.11	CMS for $Dclass_{k_1 \& k_3}$ .....	221

Figure 7.12	CMS for $Dclass_{k_2 \& k_3}$ .....	222
Figure 7.13	CMS for $Dclass_{k_1 \& k_2 \& k_3}$ .....	222
Figure 7.14	Variations of the natural frequencies in the structure of degradation .....	223
Figure 7.15	CSMS for $Dclass_{k_1}$ (RSGs measurements) .....	227
Figure 7.16	CSMS for $Dclass_{k_2}$ (RSGs measurements) .....	227
Figure 7.17	CSMS for $Dclass_{k_3}$ (RSGs measurements) .....	227
Figure 7.18	CSMS for $Dclass_{k_1 \& k_2}$ (RSGs measurements) .....	228
Figure 7.19	CSMS for $Dclass_{k_1 \& k_3}$ (RSGs measurements) .....	228
Figure 7.20	CSMS for $Dclass_{k_2 \& k_3}$ (RSGs measurements) .....	228
Figure 7.21	CSMS for $Dclass_{k_1 \& k_2 \& k_3}$ (RSGs measurements) .....	229
Figure 7.22	CSMS for $Dclass_{k_1}$ (FBG sensors measurements) .....	230
Figure 7.23	CSMS for $Dclass_{k_2}$ (FBG sensors measurements) .....	230
Figure 7.24	CSMS for $Dclass_{k_3}$ (FBG sensors measurements) .....	231
Figure 7.25	CSMS for $Dclass_{k_1 \& k_2}$ (FBG sensors measurements) .....	231
Figure 7.26	CSMS for $Dclass_{k_1 \& k_3}$ (FBG sensors measurements) .....	231
Figure 7.27	CSMS for $Dclass_{k_2 \& k_3}$ (FBG sensors measurements) .....	232
Figure 7.28	CSMS for $Dclass_{k_1 \& k_2 \& k_3}$ (FBG sensors measurements) .....	232
Figure 7.29	Relative increments in prediction error in all deterioration cases based on acceleration measurements .....	237
Figure 7.30	Relative increments in prediction error in the structure of degradation based on acceleration measurements .....	238
Figure 7.31	Relative increments in prediction error in all deterioration cases based on strain measurements (from FBG sensors) .....	239
Figure 7.32	Relative increments in prediction error in the structure of degradation based on strain measurements (from FBG sensors) .....	240
Figure 7.33	Relative increments in prediction error of each decentralized monitoring network for $Dclass_{k_1}$ (using acceleration measurements) .....	242

Figure 7.34	Relative increments in prediction error of each decentralized monitoring network for <i>Dclass_k2</i> (using acceleration measurements) .....	242
Figure 7.35	Relative increments in prediction error of each decentralized monitoring network for <i>Dclass_k3</i> (using acceleration measurements) .....	243
Figure 7.36	Relative increments in prediction error of each decentralized monitoring network for <i>Dclass_k1&amp;k2</i> (using acceleration measurements) .....	243
Figure 7.37	Relative increments in prediction error of each decentralized monitoring network for <i>Dclass_k1&amp;k3</i> (using acceleration measurements) .....	244
Figure 7.38	Relative increments in prediction error of each decentralized monitoring network for <i>Dclass_k2&amp;k3</i> (using acceleration measurements) .....	244
Figure 7.39	Relative increments in prediction error of each decentralized monitoring network for <i>Dclass_k1&amp;k2&amp;k3</i> (using acceleration measurements) ...	245
Figure 7.40	Relative increments in prediction error of each decentralized monitoring network for <i>Dclass_k1</i> (using strain measurements) .....	246
Figure 7.41	Relative increments in prediction error of each decentralized monitoring network for <i>Dclass_k2</i> (using strain measurements) .....	246
Figure 7.42	Relative increments in prediction error of each decentralized monitoring network for <i>Dclass_k3</i> (using strain measurements) .....	247
Figure 7.43	Relative increments in prediction error of each decentralized monitoring network for <i>Dclass_k1&amp;k2</i> (using strain measurements) .....	247
Figure 7.44	Relative increments in prediction error of each decentralized monitoring network for <i>Dclass_k1&amp;k3</i> (using strain measurements) .....	248
Figure 7.45	Relative increments in prediction error of each decentralized monitoring network for <i>Dclass_k2&amp;k3</i> (using strain measurements) .....	248
Figure 7.46	Relative increments in prediction error of each decentralized monitoring network for <i>Dclass_k1&amp;k2&amp;k3</i> (using strain measurements) .....	249

## CHAPTER 8

Figure 8.1	Operation of the integrated health monitoring system .....	258
