LIST OF FIGURES vii

CHAPTER 1 Motivation of this research 1

CHAPTER 2 A Planar Shaped-Beam Antenna with metal grating..... 5

2.1 Structure Configuration..... 5

2.2 Method of Analysis 7

2.3 Numerical and Experimental Results..... 11

2.3.1 Measurement results of antenna..... 11

2.3.2 Effect of the dielectric slab thickness on the radiation pattern 33

2.3.3 Effect of the relative dielectric constant on the radiation pattern 35

2.3.4 Effect of the number of metal strips on the radiation pattern 36

2.3.5 Effect of the line source position on the radiation pattern 37

2.3.6 Frequency range of operation 39

2.3.7 Shaped-bean antenna for wireless LAN band operation..... 40

CHAPTER 3 A Planar Shaped-Beam Antenna with dielectric grating..... 44

3.1 Structure Configuration..... 44

3.2 Method of Analysis 46

3.3 Numerical Results..... 52

3.3.1 Effect of the relative dielectric constant on the radiation pattern 52

3.3.2 Effect of the aspect ratio of the grating layer on the radiation pattern 55
3.3.3 Effect of the dielectric grating thickness on the radiation pattern 58
3.3.4 Effect of the line source position on the radiation pattern 60
3.3.5 Frequency range of operation 62
CHAPTER 4 Concluding Remarks 64
REFERENCES 65
APPENDIX I Input-Output relation for a metal grating : Mode-matching analysis 68
APPENDIX II Mode function in the dielectric grating layer 71
APPENDIX III Far-field Calculation 76

LIST OF FIGURES

1. Figure 1(a). The planar shaped-beam antenna; structure configuration and parameters assignment 5
2. Figure 1(b) The planar shaped-beam antenna; front view 6
3. Figure 1(c) The planar shaped-beam antenna; side view 6
4. Figure 2(a) Measured, computed and target patterns of the shaped-beam antenna (ε_r =2.59, a=5mm, b=15mm, t_m=0.05mm, t_d=1.86mm, d_1=12.52mm, d_2=3.0 mm, 16 metal strips); 10.9GHz. 13
5. Figure 2(b) Measured, computed and target patterns of the shaped-beam antenna (ε_r =2.59, a=5mm, b=15mm, t_m=0.05mm, t_d=1.86mm, d_1=12.52mm, d_2=3.0 mm, 16 metal strips); 11.35GHz. 14
6. Figure 2(c) Measured, computed and target patterns of the shaped-beam antenna (ε_r =2.59, a=5mm, b=15mm, t_m=0.05mm, t_d=1.86mm, d_1=12.52mm, d_2=3.0 mm, 16 metal strips); 11.37GHz. 15
7. Figure 2(d) Measured, computed and target patterns of the shaped-beam antenna (ε_r =2.59, a=5mm, b=15mm, t_m=0.05mm, t_d=1.86mm, d_1=12.52mm, d_2=3.0 mm, 16 metal strips); 11.41GHz. 16
8. Figure 2(e) Measured, computed and target patterns of the shaped-beam antenna (ε_r =2.59, a=5mm, b=15mm, t_m=0.05mm, t_d=1.86mm, d_1=12.52mm, d_2=3.0 mm, 16 metal strips); 11.43GHz. 17
9. Figure 2(f) Measured, computed and target patterns of the shaped-beam antenna (ε_r =2.59, a=5mm, b=15mm, t_m=0.05mm, t_d=1.86mm, d_1=12.52mm, d_2=3.0 mm, 16 metal strips); 11.45GHz. 18
10. Figure 2(g) Measured, computed and target patterns of the shaped-beam antenna (ε_r =2.59, a=5mm, b=15mm, t_m=0.05mm, t_d=1.86mm, d_1=12.52mm, d_2=3.0 mm, 16 metal strips); 11.47GHz. 19
11. Figure 2(h) Measured, computed and target patterns of the shaped-beam antenna (ε_r =2.59, a=5mm, b=15mm, t_m=0.05mm, t_d=1.86mm, d_1=12.52mm, d_2=3.0 mm, 16 metal strips); 11.51GHz. 20
12. Figure 2(i) Measured, computed and target patterns of the shaped-beam antenna (ε_r =2.59, a=5mm, b=15mm, t_m=0.05mm, t_d=1.86mm, d_1=12.52mm, d_2=3.0 mm, 16 metal strips); 11.53GHz. 21
13. Figure 2(j) Measured, computed and target patterns of the shaped-beam antenna (ε_r =2.59, a=5mm, b=15mm, t_m=0.05mm, t_d=1.86mm, d_1=12.52mm, d_2=3.0 mm, 16 metal strips); 11.57GHz. 22

14. Figure 2(k) Measured, computed and target patterns of the shaped-beam antenna (ε_r =2.59, a=5mm, b=15mm, t_m=0.05mm, t_d=1.86mm, d_1=12.52mm, d_2=3.0 mm, 16 metal strips); 11.90GHz. 23
15. Figure 3(a) Measurement setup in chamber 25
16. Figure 3(b) The probe is at the position (x, y, z) = (0, 0, 52) 25
17. Figure 3(c) The probe is at the position (x, y, z) = (0, 90, 52) 26
18. Figure 3(d) The probe 26
19. Figure 4 Measured reflection coefficient for the probe. 27
20. Figure 5(a) Measured contour map of the y-direction electric field strength on a rectangular plane; 10.9GHz 27
21. Figure 5(b) Measured contour map of the y-direction electric field strength on a rectangular plane; 11.37GHz 28
22. Figure 5(c) Measured contour map of the y-direction electric field strength on a rectangular plane; 11.43GHz 28
23. Figure 5(d) Measured contour map of the y-direction electric field strength on a rectangular plane; 11.45GHz 29
24. Figure 5(e) Measured contour map of the y-direction electric field strength on a rectangular plane; 11.47GHz 29
25. Figure 5(d) Measured contour map of the y-direction electric field strength on a rectangular plane; 11.53GHz 30
26. Figure 5(f) Measured contour map of the y-direction electric field strength on a rectangular plane; 11.90GHz 30
27. Figure 6 Measured and calculated reflection coefficient for the shaped-beam antenna 31
28. Figure 7 Radiation pattern for different dielectric layer thicknesses at 11.43GHz (ε_r =2.59, a=5mm, b=15mm, t_m=0.05mm, d_1=12.52mm, d_2=3.0mm) 34
29. Figure 8 Radiation pattern for different dielectric constants at 11.43GHz (a=5mm, b=15mm, t_m=0.05mm, t_d=1.86mm, d_1=12.52mm d_2=3mm) 36
30. Figure 9 Radiation pattern for different number of metal-strip array at 11.43GHz (ε_r =2.59, a=5mm, b=15mm, t_m=0.05mm, t_d=1.86mm, d_1=12.52mm, d_2=3mm)..... 37
31. Figure 10 Radiation pattern for different distances from the line source to metal ground plane (ε_r =2.59,a=5mm, b=15mm, t_m=0.05mm, t_d=1.86mm ,d_1=12.52mm, 11.43GHz) 38
32. Figure 11 Radiation pattern for various frequencies (ε_r =2.59,a=5mm, b=15mm, t_m=0.05mm, t_d=1.86mm ,d_1=12.52mm, d_2=3mm)..... 40

33. Figure 12(a) Radiation pattern for 2.4GHz; (a) 4 metal strips..... 42
34. Figure 12(b) Radiation pattern for 2.4GHz; (b) 6 metal strips 42
35. Figure 13(a) Radiation pattern for 5.2GHz; (a) 8 metal strips..... 43
36. Figure 13(b) Radiation pattern for 5.2GHz; (b) 12 metal strips 43
37. Figure 14 The structure configuration and parameters assignment of the shaped-beam antenna 45
38. Figure 15 Radiation pattern for different dielectric constant at 5.4GHz 53
39. Figure 16 Electric field magnitude on the antenna aperture for different relative dielectric constant of dielectric rods at 5.4GHz..... 54
40. Figure 17 Radiation pattern for different aspect ratio at 5.4GHz 56
41. Figure 18 Electric field magnitude on the antenna aperture for different aspect ratio at 5.4GHz..... 57
42. Figure 19 Radiation pattern for different dielectric grating layer thickness at 5.4GHz (a=0.5, b=1.0, d_a=5, d_1=1.05, d_2=0.68) 58
43. Figure 20 Electric field magnitude on the antenna aperture for different dielectric grating layer thickness at 5.4GHz 59
44. Figure 21 Radiation pattern for different distances from line source to metal ground plane at 5.4GHz 61
45. Figure 22 Radiation pattern for different operation frequency 63
46. Figure 23 Multiplayer planar structure and its equivalent network Representation..... 71
47. Figure 24(a) Transverse field distribution of first six modes with effective dielectric constant; (a) 2.584..... 71
48. Figure 24(b) Transverse field distribution of first six modes with effective dielectric constant; (b) 2.335..... 71
49. Figure 24(c) Transverse field distribution of first six modes with effective dielectric constant; (c) 1.927..... 72
50. Figure 24(d) Transverse field distribution of first six modes with effective dielectric constant; (d) 1.384..... 72
51. Figure 24(e) Transverse field distribution of first six modes with effective dielectric constant; (e) 0.846..... 71
52. Figure 24(f) Transverse field distribution of first six modes with effective dielectric constant; (f) 0.669. 71
