

List of Figures

Fig. 2-1	Band structure (the relation of ω to k) of 1-D PC.....	6
Fig. 2-2	Omnidirectional band structure of 1-D PC.....	7
Fig. 2-3	A thin film of dielectric medium.....	10
Fig. 2-4	Band structure of 1-D PC / Transmission spectra of normal incident wave passing through 1-D PC with 10 periods.....	13
Fig. 3-1	Transmission spectra calculated for single multilayer / heterostructure.....	17
Fig. 3-2	Band structure ($d_1/d_2=0.7$) calculated by plane wave expansion method.....	18
Fig. 3-2-2	Angular transmission diagram.....	19
Fig. 3-3	Band structure ($d_1/d_2=0.7$) and choice of lattice constant for heterostructure.....	21
Fig. 3-4	Band structure and selection of two lattice constants of the heterostructure.....	22
Fig. 3-5	Band structure calculated from three-layer unit cell.....	23
Fig. 3-6	Band structure and the frequency selection for heterostructure.....	24
Fig. 3-7	Angular transmission diagram of the heterostructure.....	25
Fig. 3-8	Impedance-matching coating between the 1-D PC and air.....	26
Fig. 3-9	The transmission spectra at $\theta=0^\circ$, $\theta=20^\circ$, $\theta=50^\circ$	26
Fig. 3-10	The transmission $T(\theta)$ of the PC with impedance-matching layer of $0.224\mu\text{m}$.	27
Fig. 3-10-2	The transmission $T(\theta)$ of the PC with impedance-matching layer of $0.65\mu\text{m}$.	28
Fig. 3-11	Angular transmission and corresponding frequency in band structure.....	29
Fig. 3-12	Two ideal designs of optical switches.....	30
Fig. 3-13	Band structure of $d_1/d_2=0.7$ and frequencies for two cases of ideal designs.....	31
Fig. 3-14	Angular transmission calculated from ten periods for two cases.....	31
Fig. 3-14-2	Angular transmission calculated from twenty periods for two cases.....	32
Fig. 3-15	Frequency selection in band structure / transmission range for optical switch..	33

Fig. 4-1	The peaks of ripples taken from nine transmission spectra.....	34
Fig. 4-2	The “digital” band structure of $d_1/d_2=0.7$ calculated from ten periods.....	36
Fig. 4-3	The band structure of finite-sized PC calculated by TMM.....	37
Fig. 4-5	Finite-sized PC band structure and corresponding angular transmission.....	38
Fig. 4-6	The optical switches operating at $\theta=45^\circ$	40
Fig. 4-7-1	Band structure of finite-sized PC and selection of frequencies.....	42
Fig. 4-7-2	The angular transmission of dichroic BS with 10 periods / 20 periods PC.....	43
Fig. 4-8	The mirror rotates θ° , reflected beam will rotate $2\theta^\circ$	44
Fig. 4-9	The lightvalve combined with a multilayer and a mirror.....	45
