<b>Abstract (in Chinese)</b> .....	i
<b>Abstract (in English)</b> .....	ii
<b>Acknowledgement</b> .....	iii
<b>Contents</b> .....	iv
<b>List of Tables</b> .....	vi
<b>List of Figures</b> .....	vii
<b>Chapter 1 : Introduction</b>	
1-1 Preface.....	1
1-2 Types of Tunable Lasers.....	1
1-2-1 Array of Distributed Feedback Lasers (DFBs).....	2
1-2-2 Distributed Bragg Reflector Lasers (DBRs).....	2
1-2-3 Sampled-Grating DBR Lasers (SG-DBRs).....	3
1-2-4 Super Structure Grating DBR Lasers (SSG-DBRs).....	4
1-2-5 Grating-assisted Co-directional Coupler Lasers with Super Structure Grating Reflector (GCSRs).....	4
1-2-6 External Cavity Lasers (ECLs).....	5
1-2-7 Vertical Cavity Surface Emitting Lasers (VCSELs).....	6
1-3 Comparisons of Tunable Lasers.....	7
1-4 The Organization of Thesis.....	8
<b>Chapter 2 : Theory and Simulations of SG-DBR Lasers</b>	
2-1 Analysis and Simulations of Sampled Gratings.....	10
2-2 Vernier Effect.....	15
2-3 Operation Principle of SG-DBR Lasers.....	16
2-4 Oscillation conditions for SG-DBR lasers.....	17
2-5 Simulations of SG-DBR lasers.....	20

2-5-1 How to Design Front and Back Sampled Reflectors?.....	21
2-5-2 Characteristics in Wavelength Tuning for SG-DBR Lasers.....	21
<b>Chapter 3 : Measurement and Analysis of Characteristics for SG-DBR Lasers</b>	
3-1 Light-Current (L-I) Characteristics.....	30
3-2 Wavelength Tuning Characteristics.....	32
3-3 Linewidth Characteristics.....	41
3-4 Wavelength Switching Characteristics.....	44
<b>Chapter 4 : Conclusion</b>	
4-1 Conclusion.....	48
<b>References.....</b>	<b>49</b>

# List of Tables

		Page
Table 1-1	Comparisons of characteristics for various tunable lasers.....	7
Table 1-2	Main specific requirements which must be satisfied by tunable lasers.....	8
Table 2-1	Parameters of simulations.....	20

# List of Figures

		Page
Fig. 1-1	The structure of selectable DFB array.....	2
Fig. 1-2	The structure of conventional DBR laser and mode selection.....	3
Fig. 1-3	The structure of SG-DBR laser and mode selection.....	4
Fig. 1-4	The structure of SSG-DBR laser and mode selection.....	4
Fig. 1-5	The structure of GCSR laser and mode selection.....	5
Fig. 1-6	The structure of external cavity laser.....	6
Fig. 1-7	The structure of MEMS VESEL.....	6
Fig. 2-1	The schematic sampled grating.....	10
Fig. 2-2	Sampled grating and its spatial frequencies.....	11
Fig. 2-3	The simulation of sampled grating reflectivity.....	13
Fig. 2-4	A special case for order zero of sampled grating reflectivity.....	13
Fig. 2-5	Number of channels within 3dB envelope of sampled grating reflectivity peaks versus duty cycle.....	14
Fig. 2-6	A Vernier using two scales with a 10% pitch difference.....	15
Fig. 2-7	Laser structure where each end reflectivity has a comb characteristic.....	15
Fig. 2-8	The schematic cross-section of a SG-DBR laser.....	16
Fig. 2-9	SG-DBR laser, $r_x$ and $r_y$ are the facet reflectivities.....	17
Fig. 2-10	Spectra of front and back SG reflectors and total reflectivity.....	21
Fig. 2-11	Spectra of front and back SG reflectors, total reflectivity and threshold gain without current injection into the passive sections .....	24
Fig. 2-12	The simulation of Bragg frequency under different grating currents.....	25
Fig. 2-13	Spectra of front and back SG reflectors under current injection into the back SG section.....	25

Fig. 2-14	Total reflectivity of two SG reflectors under current injection into the back SG section.....	26
Fig. 2-15	Threshold gain under current injection into the back SG section.....	26
Fig. 2-16	Lasing wavelength under current injection into the back SG section.....	28
Fig. 2-17	Lasing wavelength under current injection into the front SG section.....	28
Fig. 2-18	Wavelength tuning as a function of the front and back SG section currents.....	29
Fig. 3-1	The experimental setup for the measurement of L-I curves.....	30
Fig. 3-2	The control panel for L-I curves measurement.....	31
Fig. 3-3	L-I curves for $I_{SOA} = 60\text{mA}, 80\text{mA}, 100\text{mA}$ at $25^{\circ}\text{C}$ .....	32
Fig. 3-4	The experimental setup for wavelength tuning characteristics.....	33
Fig. 3-5	The control panel for contour maps measurement of oscillation wavelengths, output power and side mode suppression ratio (SMSR).....	33
Fig. 3-6	The Contour map of measured oscillation wavelengths.....	34
Fig. 3-7	The Contour map of measured output power.....	35
Fig. 3-8	The Contour map of measured side mode suppression ratio.....	35
Fig. 3-9	Coarse tuning and SMSR measured versus current injection in the back SG section.....	36
Fig. 3-10	Coarse tuning and SMSR measured versus current injection in the front SG section.....	37
Fig. 3-11	The lookup table of the front SG, the back SG, and phase currents for 40 different wavelength channels.....	38
Fig. 3-12	The power and the side mode suppression ratio versus wavelength channels.....	39

Fig. 3-13	The respective set of tuning currents for each accessible wavelength channel.....	39
Fig. 3-14	The control panel for the test of 40 accessible wavelength channels.....	40
Fig. 3-15	The deviation of the measured output wavelength values forms the original wavelength assignment.....	41
Fig. 3-16	The Experimental setup for linewidth measurement.....	42
Fig. 3-17	The mixing process in terms of beat-tone slices mixed down to low frequencies that can be analyzed with electronic instrumentation.....	43
Fig. 3-18	The beat spectrum of SG-DBR and reference lasers.....	44
Fig. 3-19	The Experimental setup for wavelength switching.....	45
Fig. 3-20	The laser driver board.....	45
Fig. 3-21	The illustration for the definition of wavelength switching.....	46
Fig. 3-22	The output waveform for switching from ITU channel C42 (1543.73 nm) to C31 (1552.52 nm).....	47
Fig. 3-23	The output waveform for switching from ITU channel C31 (1552.52 nm) to C42 (1543.73 nm).....	47
