Abstract (in Chinese)…….. i

Abstract (in English)…….. ii

Acknowledgements……. iii

Contents……... iv

List of Figures……. vi

Chapter I Introduction……. 1

1-1 Background…….. 1

1-2 Motivation……..... 2

1-3 Organization of the thesis…… 4

Chapter II Theory and Methodology……... 6

2-1 Introduction……. 6

2-1.1 Origin of the negative refraction…… 6

2-1.2 Refraction phenomenon in photonic crystals……. 9

2-2 Plane-wave expansion method for band structure calculation…….. 13

2-3 FDTD method for electromagnetic simulation……..... 16

2-3.1 Free space formulation…….. 17

2-3.2 Simulation in periodic structure…… 19

Chapter III Simulation Results and Discussion…….. 23

3-1 Equal frequency surface and effective refraction index..... 23

3-2 Refractive phenomena in photonic crystal prisms……... 27

3-2.1 Photonic band structures and symmetry of eigenmode patterns... 27

3-2.2 Predictions of propagation vectors in real space……... 31

3-2.3 Positive refraction, negative refraction, and total internal reflection……... 35

3-3 Anomalous imaging in photonic crystal slabs with negative refraction... 39

3-3.1 Focusing effect…….. 39

3-3.2 Contrast to imaging in conventional lens and photonic crystal slabs……..... 45

3-4 Imaging-like phenomena in photonic crystals without negatively effective refraction index……..... 48

3-4.1 Comment on “All-angle negative refraction without negative effective index” (Phys. Rev. B 65, 201104 (2002))……..... 48

3-4.2 Direct-tunneling effect…….. 52

Chapter IV Conclusion and perspective……..... 58

Reference……..... 60
