

## 目錄

|                                 |          |
|---------------------------------|----------|
| 中文摘要 .....                      | i        |
| 英文摘要 .....                      | ii       |
| 誌謝 .....                        | iii      |
| 目錄 .....                        | iv       |
| 表目錄 .....                       | viii     |
| 圖目錄 .....                       | ix       |
| <b>一、苯二氮平類鎮靜安眠藥 .....</b>       | <b>1</b> |
| 1.1 引言 .....                    | 1        |
| 1.2 苯二氮平藥理學 .....               | 1        |
| 1.3 藥物臨床表現 .....                | 2        |
| 1.4 苯二氮平類藥物檢測技術回顧 .....         | 3        |
| <br><b>二、毛細管電泳分離方法之介紹 .....</b> | <br>6    |
| 2.1 簡介及發展歷程 .....               | 6        |
| 2.2 基本分離原理 .....                | 8        |
| 2.2.1 電泳分離與遷移率 .....            | 8        |
| 2.2.2 電滲流 .....                 | 9        |
| 2.2.3 分離效率 .....                | 10       |
| 2.3 常見的毛細管電泳分離模式 .....          | 11       |
| 2.3.1 毛細管區間電泳 .....             | 11       |
| 2.3.2 微胞電動層析法 .....             | 11       |
| 2.3.3 毛細管凝膠電泳 .....             | 12       |
| 2.3.4 毛細管等電聚焦電泳 .....           | 13       |
| 2.3.5 毛細管等速電泳 .....             | 13       |
| <br><b>三、非水相毛細管電泳簡介 .....</b>   | <br>16   |
| 3.1 非水相毛細管電泳之特性 .....           | 16       |
| 3.2 非水相溶劑的選擇 .....              | 17       |
| 3.3 非水相電泳溶劑的影響 .....            | 20       |
| 3.4 非水相毛細管電泳的優點 .....           | 20       |

|   |    |
|---|----|
| 四、利用非水相毛細管電泳法分離苯二氮平類藥物.....                 | 24 |
| 4.1 分離原理.....                               | 24 |
| 4.2 儀器裝置.....                               | 25 |
| 4.3 試藥.....                                 | 25 |
| 4.4 實驗方法.....                               | 26 |
| 4.4.1 新的毛細管調態.....                          | 26 |
| 4.4.2 實驗前、後毛細管的處理.....                      | 26 |
| 4.4.3 苯二氮平標準溶液之配製.....                      | 27 |
| 4.4.4 水相部份酸性緩衝溶液分離測試.....                   | 27 |
| 4.4.5 非水相部份甲酸系與乙酸系分離測試.....                 | 27 |
| 4.4.6 非水相部分草酸系不同分離條件之測試.....                | 27 |
| 4.4.6.1 不同草酸濃度之探討.....                      | 27 |
| 4.4.6.2 不同三乙胺濃度之探討.....                     | 28 |
| 4.4.6.3 不同有機溶液組成之探討.....                    | 28 |
| 4.4.6.4 標準濃度校正曲線之製作.....                    | 28 |
| 4.4.6.5 苯二氮平真實藥片樣品之檢測.....                  | 28 |
| 4.5 結果與討論.....                              | 29 |
| 4.5.1 水相酸性緩衝溶液測試結果.....                     | 29 |
| 4.5.2 利用弱酸性有機酸(甲酸系,乙酸系)非水相緩衝溶液測試<br>結果..... | 29 |
| 4.5.3 緩衝溶液中不同草酸濃度對分離結果之影響.....              | 30 |
| 4.5.4 緩衝溶液中不同三乙胺濃度對分離結果之影響.....             | 31 |
| 4.5.5 緩衝溶液中不同比例有機溶液組成對分離結果之影響<br>.....      | 31 |
| 4.5.6 再現性分析與定量標準校正曲線.....                   | 32 |
| 4.5.7 苯二氮平真實藥片樣品之檢測.....                    | 32 |
| 4.6 結論.....                                 | 33 |
| 五、常見毛細管電泳法線上濃縮技術介紹.....                     | 51 |
| 5.1 緒論.....                                 | 51 |
| 5.2 電場放大樣品堆積法.....                          | 52 |

|                                     |    |
|-------------------------------------|----|
| 5.3 大體積樣品線上濃縮法.....                 | 52 |
| 5.4 不同酸鹼值緩衝溶液接合濃縮.....              | 54 |
| 5.5 緩衝溶液酸鹼值調整修飾濃縮.....              | 54 |
| 5.6 掃掠式線上濃縮技術.....                  | 55 |
| 5.6.1 使用帶電微胞執行後樣品區帶濃縮模式.....        | 56 |
| 5.6.2 使用帶電微胞執行前樣品區帶濃縮模式.....        | 56 |
| 5.6.3 使用中性微胞執行後樣品區帶濃縮模式.....        | 57 |
| 5.7 複合型掃掠式線上濃縮技術.....               | 57 |
| 5.7.1 陽離子選擇性全注入結合掃掠式線上濃縮法.....      | 58 |
| 5.7.2 陰離子選擇性全注入結合掃掠式線上濃縮法.....      | 59 |
| 5.8 掃掠式線上濃縮法之後管柱濃縮模式數學公式.....       | 59 |
| <br>六、利用掃略式線上濃縮毛細管電泳法分析苯二氮平類藥物..... | 71 |
| 6.1 濃縮分離原理.....                     | 71 |
| 6.2 儀器裝置.....                       | 72 |
| 6.3 試藥.....                         | 73 |
| 6.4 實驗方法.....                       | 73 |
| 6.4.1 新的毛細管調態.....                  | 73 |
| 6.4.2 實驗前、後毛細管的處理.....              | 74 |
| 6.4.3 苯二氮平標準溶液之配製.....              | 74 |
| 6.4.4 不同濃縮分離條件之測試.....              | 74 |
| 6.4.4.1 不同 pH 值緩衝溶液之影響.....         | 74 |
| 6.4.4.2 不同離子濃度緩衝溶液之影響.....          | 75 |
| 6.4.4.3 不同 CTAB 含量緩衝溶液之影響.....      | 75 |
| 6.4.4.4 不同甲醇含量緩衝溶液之影響.....          | 75 |
| 6.4.4.5 樣品區帶不同離子濃度緩衝溶液之影響.....      | 76 |
| 6.4.4.6 樣品注射時間.....                 | 76 |
| 6.4.4.7 樣品掃集濃縮效果及放大倍率.....          | 77 |
| 6.4.4.8 再現性分析及定量校正曲線.....           | 77 |
| 6.5 結果與討論.....                      | 77 |
| 6.5.1 不同 pH 值緩衝溶液之影響.....           | 77 |

|                              |     |
|------------------------------|-----|
| 6.5.2 不同離子濃度緩衝溶液之影響.....     | 78  |
| 6.5.3 不同 CTAB 含量緩衝溶液之影響..... | 78  |
| 6.5.4 不同甲醇含量緩衝溶液之影響.....     | 79  |
| 6.5.5 樣品區帶不同離子濃度緩衝溶液之影響..... | 80  |
| 6.5.6 樣品注射時間之探討.....         | 81  |
| 6.5.7 樣品掃集濃縮效果及放大倍率.....     | 81  |
| 6.5.8 再現性分析及定量校正曲線.....      | 82  |
| 6.6 結論.....                  | 82  |
| 七、結論.....                    | 100 |
| 八、參考文獻.....                  | 101 |

## 表目錄

|   |    |
|---|----|
| Table 3-1 Properties of some organic solvents used in CE.....   | 23 |
| Table 4-1 pKa value of basic analytes in MeOH at 25°C .....   | 34 |
| Table 4-2 pKa value of anionic analytes in MeOH at 25°C .....   | 35 |
| Table 4-3 The compare of theoretical plates of Benzodiazepines separation .....                               | 36 |
| Table 4-4 Migration time 、 reproducibilities of Benzodiazepines for Non-Aqueous CE.....                       | 37 |
| Table 4-5 Regression equation、R <sup>2</sup> and detection limits of Benzodiazepines for Non-Aqueous CE ..... | 38 |
| Table 6-1 Migration time 、 reproducibilities of Benzodiazepines for Sweeping-MEKC .....                       | 84 |
| Table 6-2 Regression equation、R <sup>2</sup> and detection limits of Benzodiazepines for Sweeping-MEKC .....  | 85 |
