

Figure 16.  $\beta$ -galactosidase activity by filter assay of *S. cerevisiae* cells containing *CDR1p-lacZ* fusion and candidate plasmids under induction by miconazole at different concentrations. Left panel: 0ug/ml miconazole; right panel: 100ug/ml miconazole.

- (+), Positive control- cells containing *REP2* insert plasmid (pRS426-based) in 2B/348*CDR1p-lacZ*
- (-), Negative control- cells containing vector plasmid (pRS426) alone in 2B/348*CDR1p-lacZ*
