ENGLISH ABSTRACT	I
CHINESE ABSTRACT	II
ACKNOWLEDGMENT	III
CONTENTS	IV
LIST OF FIGURES	VII

CHAPTER 1 INTRODUCTION AND OVERVIEW

1.1 Research Motivation and Purpose.....	1
1.2 Organization of This Dissertation.....	7

CHAPTER 2 CONVENTIONAL SIMPLEX SLIDING-MODE CONTROL

2.1 Introduction.....	8
2.2 Simplex Set.....	9
2.3 Conventional Simplex Sliding-Mode Control Design.....	11

CHAPTER 3 UNIFORMLY DISTRIBUTED SIMPLEX SET

3.1 Definition of Uniformly Distributed Simplex Set.....	18
3.2 Conventional Construction.....	20
3.3 New Construction.....	23

CHAPTER 4 UNIFORMLY DISTRIBUTED SIMPLEX SLIDING-MODE CONTROL

FOR MATCHED DISTURBANCES

4.1 System Description.....	27
4.2 Sliding Vector Design.....	28
4.3 UDSSMC Algorithm.....	30
4.4 Smoothing Strategy for UDSSMC.....	35
4.5 Numeric Example and Simulation Results.....	40

CHAPTER 5 UNIFORMLY DISTRIBUTED SIMPLEX SLIDING-MODE

CONTROL WITH GREY PREDICTION

5.1 Introduction.....	57
5.2 System Description.....	58
5.3 Grey Prediction.....	59
5.4 A novel UDSSMC incorporated with Grey Prediction.....	63
5.4.1 Design of The New UDSSMC Controller.....	63
5.4.2 Grey Prediction for Disturbances.....	66
5.5 Simulation Results.....	68

CHAPTER 6 ROBOTIC MANIPULATOR CONTROL BASED ON UNIFORMLY

DISTRIBUTED SIMPLEX SLIDING-MODE CONTROL

6.1 Problem Formulation.....	75
6.2 UDSSMC algorithm.....	77

6.3 Numeric Example and Simulation Results.....	81
CHAPTER 7 CONCLUSIONS AND SUGGESTIONS FOR FUTURE RESEARCH	
7.1 Conclusions.....	87
7.2 Future Research.....	89
BIBLIOGRAPHY.....	90

LIST OF FIGURES

Figure 2.1	Simplex set for $m = 2$	11
Figure 2.2	The SSMC control algorithm for $m = 2$	13
Figure 3.1	Uniformly distributed simplex set constructed by the conventional method for the case of $m = 2$	22
Figure 3.2	Uniformly distributed simplex set constructed by the novel method for the case of $m = 2$	26
Figure 4.1	The sub-region formed by the uniformly distributed simplex set....	37
Figure 4.2	The novel smoothing strategy	39
Figure 4.3	Time response of the sliding vector for Case 1 of Example 1.....	48
Figure 4.4	The trajectory of the sliding vector in the σ space for Case 1 of Example 1.....	48
Figure 4.5	State variables x_1-x_4 for Case 1 of Example 1.....	49
Figure 4.6	Control Inputs for Case 1 of Example 1.....	49
Figure 4.7	Time response of the sliding vector for Case 2 of Example 1.....	50
Figure 4.8	The trajectory of the sliding vector in the σ space for Case 2 of Example 1.....	50
Figure 4.9	State variables x_1-x_4 for Case 2 of Example 1.....	51
Figure 4.10	Control Inputs for Case 2 of Example 1.....	51

Figure 4.11	Time response of the sliding vector for Case 3 of Example 1.....	52
Figure 4.12	The trajectory of the sliding vector in the σ space for Case 3 of Example 1.....	52
Figure 4.13	State variables x_1-x_4 for Case 3 of Example 1.....	53
Figure 4.14	Control Inputs for Case 3 of Example 1.....	53
Figure 4.15	Time response of the sliding vector for Example 2.....	54
Figure 4.16	The norm of the sliding vector for Example 2.....	54
Figure 4.17	State variables x_1-x_7 for Example 2.....	55
Figure 4.18	Control Inputs for Example 2.....	56
Figure 5.1	Time response of the sliding vector for Controller 1.....	72
Figure 5.2	Time response of the sliding vector for Controller 2.....	72
Figure 5.3	The trajectory of the sliding vector in the σ space for Controller 2..	73
Figure 5.4	State variables x_1-x_4 for Controller 2.....	73
Figure 5.5	Control Inputs for Controller 2.....	74
Figure 6.1	Two-link robotic manipulator model.....	81
Figure 6.2	The norm value of the sliding vector.....	84
Figure 6.3	The trajectory of the sliding vector in the σ space.....	84
Figure 6.4	Tracking error (a) $x_1 = \theta - \theta_d$ (b) $x_3 = \phi - \phi_d$	85
Figure 6.5	The trajectories of the desired and actual joint positions.....	85

Figure 6.6 Control Inputs..... 86
