
Content

Content.....	i
List of Figure.....	iii
List of Tables.....	v
Chapter 1 Introduction	- 1 -
Chapter 2 Problem Description.....	- 3 -
2.1 MMOG market situation.....	- 3 -
2.2 The essentials of next generation MMOG middleware	- 5 -
Chapter 3 Related Work	- 7 -
3.1 Common Communication model in Online Games.....	- 7 -
3.1.1 Peer-to-Peer Architecture.....	- 8 -
3.1.2 Client-Server Architecture	- 8 -
3.1.3 Proxy/Gateway-based Architecture	- 9 -
3.2 Next Generation MMOG architecture.....	- 9 -
Chapter 4 DoIT's Approaches, Architecture, Framework	- 14 -
4.1 Our Approach.....	- 14 -
4.2 DoIT Architecture	- 15 -
4.3 Framework	- 18 -
4.3.1 Network Engine	- 20 -
4.3.2 Game Logic Adapter	- 23 -
4.3.3 Object Container	- 24 -
4.3.4 Object Migration.....	- 26 -
4.3.5 Plug-in Framework	- 30 -
4.3.6 Management Framework	- 33 -
Chapter 5 DoIT Development Tool with Generative Programming Concept	- 41 -
5.1 Basic Concept	- 41 -
5.2 Code Generation Engine	- 44 -
5.2.1 Protocol-driven code generation.....	- 45 -
5.2.2. Management function code generation.....	- 52 -
5.3 Benefits	- 55 -
Chapter 6 Experiments and Evaluations	- 60 -
6.1 Assumption	- 60 -
6.2 Experiments	- 61 -
6.2.1 Performance Evaluation of Message-oriented Network Engine....	- 61 -
6.2.2 Performance Evaluation of DoIT client-gateway-server architecture	

design	- 64 -
6.2.3 Performance Evaluation of a virtual world simulation	- 66 -
6.3 Discussion	- 73 -
Chapter 7 Conclusions and Future Works.....	- 77 -
7.1 Conclusions.....	- 77 -
7.2 Future Works.....	- 79 -
References:.....	- 82 -
Appendix A. How to develop content on DoIT platform	I
A.1 Packages in DoIT platform	I
A.2 How to Use NetEngine	III
A.3 DOIT API.....	VI
A.4 The Complete Development Flow in DoIT:	IX
A.5 Programming the Client Side.....	XII
A.6 How to develop your own Plug-ins.....	XII
A.7 UML diagram of other Server Components.....	XIV
Appendix B. DoIT Message definition XML schema	XVIII

List of Figure

Figure 3-1. Three typical communication architecture of MMOG.....	- 7 -
Figure 3-2. Generic 4-tiers architecture of MMOG.....	- 11 -
Figure 4-1. Communication model of traditional MMOG	- 14 -
Figure 4-2. DoIT platform 4-tier architecture.....	- 15 -
Figure 4-3. System Components of DoIT.....	- 18 -
Figure 4-4. Relationship of Server Components.....	- 19 -
Figure 4-5. Class diagram of NetEngine library	- 21 -
Figure 4-6. Design of Virtual World Game Logic Adapter.....	- 23 -
Figure 4-7. Virtual World Logic Adapter Class Diagram	- 24 -
Figure 4-8. Interface of GameContext	- 25 -
Figure 4-9. Interface of GameSpace	- 26 -
Figure 4-10. Avatar Migration, source region and destination region are in the same server.....	- 27 -
Figure 4-11. Avatar Migration, source region and destination are in different servers.	- 28 -
Figure 4-12. Region Migration	- 30 -
Figure 4-13. Server Component-based Framework.....	- 31 -
Figure 4-14. description of MyPlugin.properties.....	- 33 -
Figure 4-15. n-tiers management architecture	- 33 -
Figure 4-16. The Management System on the DoIT platform.....	- 35 -
Figure 4-17. Partial code segment of the MBean declaration.....	- 36 -
Figure 4-18. Process flow of MBeanLoader in single game server.....	- 37 -
Figure 4-19. Interface of ServerManagerMBean.....	- 37 -
Figure 4-20. Central Management Server Work Flow.....	- 39 -
Figure 4-21. A simple management client with access to ServerManagerMBean.	- 40 -
Figure 5-1. Developer's view for MMOG Development	- 42 -
Figure 5-2. Code Generation System of DoIT platform	- 44 -
Figure 5-3. DOIT Platform Inner Message Process Flow	- 46 -
Figure 5-4. Examples of the Message Format	- 47 -
Figure 5-5. MMOG message script document.....	- 48 -
Figure 5-6. The Code of MoveMessage and LoginMessage	- 49 -
Figure 5-7. The Code of LoginMessageHandler and LoginMessageFactory	- 52 -
Figure 5-8. Code Generator Model for DoIT platform content developers...	-

Figure 6-1. Communication architecture of round 1 - 62 -
Figure 6-2. Experiment result of round1..... - 63 -
Figure 6-3. Communication architecture of round 2 - 64 -
Figure 6-4. Experiment result of round 2..... - 66 -
Figure 6-5. Communication architecture of round 3 - 68 -
Figure 6-6. Average response time – total - 69 -
Figure 6-7. Standard deviation total..... - 70 -
Figure 6-8. Average response time – migration - 71 -
Figure 6-9. Standard Deviation – Migration..... - 72 -

List of Tables

Table 6-1. hardware configuration of experiments round 1.....	- 61 -
Table 6-2. Experiment result of round 1	- 63 -
Table 6-3. Hardware configuration. of round 2	- 64 -
Table 6-4. Experiment result of round 2	- 65 -
Table 6-5. Hardware Configuration of round 3	- 67 -
Table 6-6. Average Response Time – Total.....	- 69 -
Table 6-8. standard deviation – total.....	- 70 -
Table 6-9. Average response time – migration.....	- 71 -
Table 6-10. Standard Deviation – Migration	- 72 -
Table 6-11. CPU load.....	- 73 -
Table 6-12. The total amount of messages forwarded per second in a gateway	- 73 -
