ABSTRACT(Chinese).....	i
ABSTRACT.....	iii
ACKNOWLEDGEMENT.....	v
CONTENTS.....	vi
TABLE LISTS.....	ix
FIGURE CAPTIONS.....	x

CHAPTER 1 Introduction

1.1 Overview of Vacuum Microelectronics.....	1
1.1.1 History of Vacuum Microelectronics.....	1
1.1.2 Applications of Vacuum Microelectronic Devices.....	3
1.2 Novel Nano-sized Materials for Field Emission Display.....	5
1.2.1 Theory Background.....	5
1.2.2 Cold Cathode Structures and Materials for Field Emission Displays.....	8
1.2.2.A Spindt-Type Field Emitters.....	9
1.2.2.B Si Tip Field Emitters.....	10
1.2.2.C Carbon and Nano-Sized Emitters.....	10
1.3 A Great Discovery of Nano Electronic Technology—Carbon Nanotubes.....	11
1.3.1 Structures of Carbon Nanotubes.....	11
1.3.1.A Single-walled Carbon Nanotubes.....	12
1.3.1.B Multi-walled Carbon Nanotubes.....	12
1.3.2 Properties and Synthesis of Carbon Nanotubes.....	12
1.3.3 Potential Application of Carbon Nanotubes.....	13

1.4 Thesis Organization.....14

CHAPTER 2 Paper Review and Motivation

2.1 Paper Review..... 15

 2.1.1 Overview of CNTs Grown at Low Temperature.....15

 2.1.2 Theoretical Background.....16

 2.1.3 Improvement of Gated Triode Structure.....18

 2.1.4 CNTs Grown on Glass Substrate.....19

2.2 Motivation.....20

 2.2.1 CNTs Grown at Low Temperature.....20

 2.2.2 Gate Controlled Anode Current.....21

 2.2.3 CNT-FED on Glass Substrate.....22

CHAPTER 3 Experimental Procedures

3.1 Introduction.....23

3.2 Low Temperature Growth of CNTs.....23

 3.2.1 Forward Arrangement.....23

 3.2.2 CNT Synthesis.....24

3.3 Triode Structure on Si Substrate.....25

 3.3.1 Structure Fabrication.....25

 3.3.2 CNT Synthesis.....26

3.4 CNTs Grown on Glass Substrate.....27

 3.4.1 Sample Preparation.....27

 3.4.2 CNT Synthesis.....27

3.5 Analysis.....28

CHAPTER 4 Results and Discussion

4.1 Low Temperature Growth of CNTs.....29

 4.1.1 Temperature Dependence (Experiment A, B, C, D).....29

 4.1.1.I Pretreatment.....29

 4.1.2.II Growth of CNTs.....30

 4.1.2 Growth Time Effect (Experiment E).....34

 4.1.3 Eutectic Point Influence (Experiment F).....35

4.2 Triode Structure on Si Substrate (Experiment G, H).....36

4.3 CNTs Grown on Glass Substrate (Experiment I).....37

CHAPTER 5 Conclusions and Future Prospects

5.1 Conclusions.....40

5.2 Future Prospects.....41

References.....43

Vita.....104
