Acknowledgement

First, I am very grateful to my advisor, Dr. Ta-Sung Lee, for his enthusiastic guidance and great patience, especially the training of oral presentation and being earnest in our works. Then I would also thanks to Wei-Chi Lee, Po-Tien Lee, Chih-Yuan Lin, and Dr. Juinn-Horng Deng who spend lots of time for my consultation. Special thanks to Chen-Mo Chen for the technical support on the FFT component. Heartfelt thanks are also offered to all members in the Communication Signal Processing (CSP) Lab for their constant encouragement and help.

Last, but not the least, I would like to show my sincere thanks to Te-Hsin Wu for supporting me when I am frustrated by the temporary failure and helping me to examine the thesis carefully. Finally, I would like to express my deepest gratitude to my family for their endless love, especially my mom for her tender encouragement, and my dad as a constant reminder of health.
