

## List of Tables

Tab. 4.1 Simulation parameters for determining period of metallic layer .....	48
Tab. 4.2 Simulation parameters for determining thickness of metallic layer .....	50
Tab. 4.3 Simulation parameters for determining duty cycle of metallic layer .....	53
Tab. 4.4 Simulation parameters for determining material of metallic layer .....	55
Tab. 4.5 Simulation parameters for determining thickness of dielectric layer .....	59
Tab. 4.6 Simulation parameters for determining material of dielectric layer .....	61
Tab. 5.1 Relationship between film thickness and spin speed of PMMA solution formulated by ourselves .....	68
Tab. 5.2 Conditions for etching germanium layer by RIE .....	74
Tab. 5.3 Conditions for etching germanium and PMMA/MMA in tri-level resist system by RIE .....	80
Tab. 5.4 Conditions for etching aluminum layer by ICP-RIE .....	82
