

## List of Figures

Figure 1-1 The way Jini technology works.....	2
Figure 2-1 The J2ME universe .....	5
Figure 2-2 The MIDlet lifecycle.....	6
Figure 2-3 JiniME federation architecture.....	12
Figure 2-4 JiniME-capable mobile device architecture.....	14
Figure 2-5 Jini Bridge architecture.....	15
Figure 2-6 Constructing a Bridge for a Mobile Service and registering it with the Jini federation (JiniME) .....	16
Figure 2-7 A Jini clients discovering a Mobile Service and invoking it via the Mobile Service Bridge (JiniME).....	17
Figure 2-8 Constructing a Bridge for a Sessile Service and registering it with the Jini federation (JiniME) .....	18
Figure 2-9 A JiniME clients discovering a Sessile Service and invoking it via the Sessile Service Bridge (JiniME) .....	19
Figure 2-10 Kerberos authentication protocol.....	20
Figure 2-11 Interaction of different Kerberos administrative domain .....	21
Figure 3-1 Secure JiniME federation architecture.....	25
Figure 3-2 Secure JiniME-capable mobile device architecture.....	26
Figure 3-3 Jini Bridge architecture (Secure JiniME) .....	27
Figure 3-4 Constructing a Bridge for a Mobile Service and registering it with the Jini federation (Secure JiniME) .....	28
Figure 3-5 A Jini clients discovering a Mobile Service and invoking it via the Mobile Service Bridge (Secure JiniME).....	29
Figure 3-6 Constructing a Bridge for a Sessile Service and registering it with the Jini federation (Secure JiniME) .....	30
Figure 3-7 A JiniME clients discovering a Sessile Service and invoking it via the Sessile Service Bridge (Secure JiniME) .....	31
