中文摘要.....	i
Abstract.....	iv
謝誌.....	viii
Table of contents.....	ix
List of Figures.....	xiv
List of tables.....	xx
List of Chemicals.....	xxii

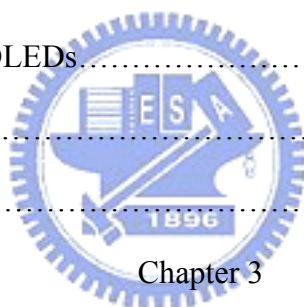

Chapter 1

Organic Light-Emitting Diodes.....	1
1-1 Introduction.....	1
1-1-1 Inorganic Light-Emitting Diodes (LEDs).....	1
1-1-2 Organic Light-Emitting Diodes (OLEDs).....	2
1-1-3 Polymer Light-Emitting Diodes (PLEDs).....	2
1-1-4 Device configuration of OLEDs.....	3
1-1-5 Materials in OLEDs.....	5
1-1-5-1 Hole-transporting materials.....	5
1-1-5-2 Electron-transporting and hole-block materials.....	5
1-1-5-3 Light-emitting materials.....	6
1-2 Motivation.....	8
1-3 References.....	9

Chapter 2

Red Emitting Fluorenes as the Efficient Host Emitter for Non-Doped Red Organic Light-Emitting Diodes.....	11
2-1 Introduction.....	11

2-1-1 Recent non-doped red organic light-emitting diodes.....	14
2-2 Motivation of research.....	22
2-3 Experimental.....	24
2-3-1 Materials.....	24
2-3-2 Instruments.....	24
2-3-3 Synthesis.....	26
2-4 Results and Discussion.....	33
2-4-1 Synthesis.....	33
2-4-2 Analysis of X-ray Crystal structure.....	34
2-4-3 Thermal Analysis.....	35
2-4-4 Fluorescence Analysis.....	36
2-4-5 Characterization of red OLEDs.....	37
2-5 Conclusion.....	40
2-6 References.....	41

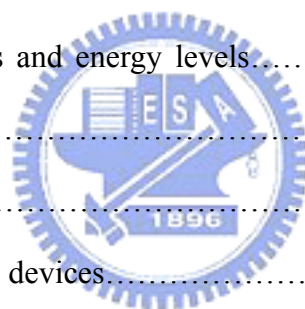

Influence of Molecular Dipoles on the photoluminescence and Electroluminescence of Dipolar Donor-Acceptor-Substituted Spirobifluorene Fluorophores.....	45
3-1 Introduction.....	45
3-1-1 Short Introduction.....	45
3-1-2 Electronic Coupling of the Spiro-linked π -system.....	46
3-2 Motivation of research.....	49
3-3 Experimental.....	52
3-3-1 Materials.....	52
3-3-2 Instrument.....	52
3-3-3 Synthesis.....	53
3-4 Results and Discussion.....	63

3-4-1 Improved synthesis of 2,2'-dibromo-9,9'-spirobifluorene and its 2,2'-bisdonor-7,7'-bisacceptor-substituted -9,9'-spirobifluorene derivatives.....	63
3-4-1-1 Synthesis of 2,2'-dibromo-9,9'-spirobifluorene.....	63
3-4-1-2 Synthesis of 2,2'-bisdonor-7,7'-bisacceptor-substituted-9,9'-spirobifluorene derivatives.....	66
3-4-1-3 Optical properties of 2,2'-bisdonor-7,7'-bisacceptor-substituted-9,9'-spirobifluorene derivatives.....	67
3-4-1-4 Summary.....	69
3-4-2 Characterization of BisPhSPDPV vs PhSPDPV, BisPhSPCHO vs PhSPCHO and BisPhSPDCV vs PhSPDCV.....	70
3-4-2-1 Thermal analysis.....	70
3-4-2-2 Crystal X-ray Structure.....	71
3-4-2-2 Molecular dipole moments.....	76
3-4-2-3 Optical properties analysis.....	78
3-4-2-3-1 Absorption and fluorescence analysis.....	78
3-4-2-3-2 Solvatochromic effect.....	79
3-4-2-3-3 Photoluminescence quantum yield in solution and electric field.....	81
3-4-2-3-4 Energy level of spirobifluorenes and their OLED layer structure analysis.....	85
3-4-2-4 Characterization of red, orange and yellow OLEDs.....	86
3-4-2-5 Non-Dopant Green OLEDs Based on PhSPCHO and BisPhSPCHO as well as Non-dopant Blue OLEDs Based on PhSPDPV and BisPhSPDPV.....	91
3-5 Conclusions.....	96
3-6 References.....	97

Chapter 4

Diaza-Substituted Spirobifluorenes Having Enhanced Electron Transporting Ability for Highly Efficient Non-Doped Blue Organic Light-Emitting Diodes.....	107
4-1 Introduction.....	107
4-2 Motivation of research.....	107
4-3 Experimental.....	109
4-3-1 Materials.....	109
4-3-2 Instrument.....	109
4-3-3 Synthesis	110
4-4 Results and Discussion.....	113
4-4-1 Synthesis.....	113
4-4-2 Thermal properties.....	114
4-4-3 Photophysical properties and energy levels.....	114
4-4-4 Electrochemistry.....	116
4-4-5 OLEDs Characterization.....	117
4-4-5-1 High performance blue devices.....	117
4-4-5-2 Current Density-Voltage characteristic of electron or hole only devices.....	118
4-4-5-3 PhSPDPV and PhSP _{N2} DPV OLED test.....	120
4-5 Conclusions.....	123
4-6 References.....	124

Chapter 5

Potent Blue Emitting Ambipolar Fluorenes Dopants for Enhancing the Performance of Deep Blue Organic Light-Emitting Devices.....	129
5-1 Introduction.....	129
5-2 Motivation of research.....	131
5-3 Experimental.....	132
5-3-1 Materials.....	132

5-3-2 Instrument.....	133
5-3-3 Synthesis.....	133
5-4 Results and Discussion.....	145
5-4-1 Synthesis.....	145
5-4-2 Absorption and fluorescence spectroscopic analysis.....	146
5-4-3 Electroluminescence properties.....	148
5-4-3-1 Devices test of oPhFBT	148
5-4-3-2 Devices test of PhFBT.....	150
5-5 Conclusion.....	157
5-6 Reference.....	157
Appendix ^1H and ^{13}C NMR spectra.....	160

List of Figures

	Page
Figure 1-1. Configuration of ITO/bis(triarylamine)/Alq ₃ /Mg:Ag device and molecular structures.....	2
Figure 1-2. Configuration of devices based on PPV and MEH-PPV.....	3
Figure 1-3. A configuration of Anode/HTL/ETL/Cathode device and energy level diagram.....	4
Figure 1-4. The structures of TPD, NPB, mTDATA and Spiro-TAD.....	5
Figure 1-5. The structures of PBD, Spiro-PBD, TPBI, BCP and PyPySPyPy.....	6
Figure 1-6. The structures of Beq ₂ and DSA-amine.....	7
Figure 1-7. The structures of C545T, DCJTb, DSA, and BCzVBi.....	8
Figure 2-1. Fluorescence image of Nile Red, DCM and TPP in solution (1,4-dioxane) and in solid state.....	12
Figure 2-2. Fluorescence spectra of Alq ₃ doped with DCM as a function of DCM concentration.....	13
Figure 2-3. Relative EL quantum efficiencies as a function of dopant concentration in Alq ₃	13
Figure 2-4. The chemical structure of (PPA)(PSA)Pe-1, and the EL spectra of devices.....	14
Figure 2-5. The chemical structures of acen , and the EL spectra of devices: ITO/NPB/ acen /BCP/Alq ₃ /Mg:Ag closed square: acen1 , opened circle: acen2 , opened triangle: acen3 , cross: acen4).....	15
Figure 2-6. The chemical structures of BSN and 2-TNATA.....	16
Figure 2-7. The chemical structures of D-CN and OXD, and the characterization of devices.....	16

Figure 2-8. The chemical structures bzta1 , bzta2 and bzta3 , and electroluminescence spectra of ITO/ btza /TPBI/Mg:Ag.....	17
Figure 2-9. The synthetic route of NPAFN	18
Figure 2-10. The PL and EL spectra of NPAFN	18
Figure 2-11. The chemical structures TPZ1 , TPZ2 , CAPP , CAPQ and QPMA	20
Figure 2-12. The chemical structures NPAMLMe and INDMLMe	20
Figure 2-13. The PL and EL spectra of NPAMLMe	21
Figure 2-14. The chemical structure of fluorene.....	23
Figure 2-15. X-ray determined molecular structure and crystal packing diagram of pTSPDCV (left column) and PhSPDCV (right column).....	35
Figure 2-16. White light (top) and UV (bottom) illumination of the powder of Nile Red, DCM, pTFDCV , pTSPDCV , and PhSPDCV	36
Figure 2-17. CIE 1931 chromaticity diagram (left) and EL spectra (right) of device I, II, and III containing pTFDCV , pTSPDCV , and PhSPDCV , respectively.....	38
Figure 2-18. External quantum efficiency-Current density-EL intensity ($\eta_{\text{EXT}}-I-L$) characteristics of devices I-V.....	40
Figure 3-1. General structure of substituted of 9'9-spirobifluorene.....	46
Figure 3-2. Model of spiro conjugation of molecular orbitals.....	47
Figure 3-3. The chemical structures 9'9-spirobifluorene, Spiro-6P and Spiro-PBD.....	48
Figure 3-4. (a) Photoinduced electron transfer (PET) from the donor to the acceptor of spirobifluorene. (Reprinted from ref 15) (b) The chemical structures D1A1, D1A2, D2A1 and D2A2.....	48
Figure 3-5. The chemical structures Spiro-AMO-tBu, Spiro-AMPO-tBu, Spiro-AMO-CN and Spiro-AMPO-CN.....	49
Figure 3-6. ^1H NMR spectra of 2,2'-dibromo-9,9'-spirobifluorene and Single crystal X-ray structure of 2,2'-dibromospirobifluorene.....	65

Figure 3-7. (a) Absorption spectra, (b) emission spectra, (c) emission spectra of solid state, (d) Fluorescence images of the solution (e) Fluorescence images (spin-coated solid films) of BisPhSP , BisPhSPDPV , BisPhSPCHO , BisPhSPDBTV , BisPhSPCNBTV and BisPhSPDCV in chlorobenzene, respectively.....	68
Figure 3-8. X-ray determined molecular structure and crystal packing diagram of BisPhSPDCV	72
Figure 3-9. Close-up view of the interaction between BisPhSPDCV molecules.....	72
Figure 3-10. BisPhSPDCV crystal packing diagrams containing solvated molecules, toluene (left figure) and carbon tetrachloride (right figure).....	73
Figure 3-11. X-ray determined molecular structure and crystal packing diagram of PhSPCHO	74
Figure 3-12. X-ray determined molecular structure and crystal packing diagram of BisPhSPCHO	74
Figure 3-13. An unparallel ring-to-ring contact between C19 and C45 (3.34 Å) of PhSPCHO	75
Figure 3-14. An edge-to-edge side way interaction between two phenyl rings of neighboring molecules of PhSPCHO	75
Figure 3-15. The face-on π - π interaction between formyl acceptor and the phenyl ring of diphenylamino donor of BisPhSPCHO	75
Figure 3-16. Dipole moment in unit of Debye (D) of PhSPDCV , BisPhSPDCV , PhSPCHO , BisPhSPCHO , PhSPDPV and BisSPDPV	76
Figure 3-17. Fluorescence spectra of PhSPDCV , BisPhSPDCV , PhSPCHO , BisPhSPCHO , PhSPDPV , and BisPhSPDPV	80
Figure 3-18. Relative energy-level alignments and layer thickness of OLEDs.....	85

Figure 3-19. Photoluminescence spectra of thin films of PhSPDCV and BisPhSPDCV compared with EL spectra of corresponding non-dopant and dopant OLEDs.....	88
Figure 3-20. 1931 CIE color chromaticity diagram of dopant and non-dopant PhSPDCV and BisPhSPDCV OLEDs.....	88
Figure 3-21. Absorption spectra of PhSPDCV , DCM, and rubrene and emission spectrum of solid state Alq ₃	90
Figure 3-22. The EL spectra of ITO/NPB (50 nm)/red dopant (0.5 %) in Alq ₃ (40 nm)/BCP (10 nm)/Alq ₃ (30 nm).....	90
Figure 3-23. Photoluminescence spectra of thin films of PhSPCHO , BisPhSPCHO , PhSPDPV , and BisSPDPV compared with EL spectra of corresponding non-dopant OLEDs.....	92
Figure 3-24. 1931 CIE color chromaticity diagram of non-dopant PhSPCHO , BisPhSPCHO , PhSPDPV , and BisPhSPDPV OLEDs.....	92
Figure 3-25. Efficiency-current density-electroluminescence and current density-voltage characteristics of non-dopant OLEDs based on PhSPCHO and BisSPCHO as well as PhSPDPV and BisPhSPDPV	94
Figure 4-1. Chemical structures of BPhen, BCP, Ansole-diazaF, terfluorene and diaza-terfluorene.....	108
Figure 4-2. Chemical structures of PhSPDPV and PhSP_{N2}DPV	109
Figure 4-3. DSC and TGA scans of PhSPDPV and PhSP_{N2}DPV	114
Figure 4-4. Normalized UV-vis absorption and photoluminescence spectra of PhSPDPV and PhSP_{N2}DPV	115
Figure 4-5. (a) Oxidation and (b) reduction of cyclic voltammograms of PhSPDPV and PhSP_{N2}DPV	116

Figure 4-6. Electroluminescence (EL) characteristics of blue non-dopant OLEDs based on PhSPDPV and PhSP_{N2}DPV	118
Figure 4-7. Characterization of Carrier-only devices.....	119
Figure 4-8. Efficiency-current density-electroluminescence ($\eta_{EXT-I-L}$) and Current density-voltage ($I-V$) characteristics of devices.....	121
Figure 5-1. The chemical structures of DPVBi , AND , and MADN	130
Figure 5-2. The chemical structures of BCzVBi , DSA-Ph , BD-1 , TBP , and 5a	131
Figure 5-3. The chemical structures of DBP and DBzA	132
Figure 5-4. Ambipolar design of fluorene- and spirobifluorene-based blue fluorophores.....	132
Figure 5-5. Absorption and fluorescence spectra of fluorene and spirobifluorene compounds.....	147
Figure 5-6. (a) Efficiency-current density-electroluminescence ($\eta_{EXT-I-L}$) characteristics of devices.; (b) The EL spectra of devices.....	150
Figure 5-7. (a) The diagram of energy levels.; (b) the overlap of the absorption and PL spectra of oPhFBT and the PL spectra of MAND in chlorobenzene.....	150
Figure 5-8. The overlap of the absorption spectra of PhFBT and oPhFBT and the PL spectra of MAND in chlorobenzene.....	151
Figure 5-9. The EL spectrum of device ITO/NPB (50 nm)/ MADN (40nm)/Alq ₃ (10 nm)/LiF (1 nm)/Al (150 nm).....	152
Figure 5-10. Electroluminescence (EL) characteristics of PhFBT based devices.....	153
Figure 5-11. The overlap of the film PL and device EL spectra of 3 % PhFBT in MADN or TPBI.....	154
Figure 5-12. The film PL spectra of x % PhFBT in MADN at room temperature.....	155
Figure 5-13. The PL spectra of PhFBT with increasing solvent polarity (in the cosolvent of	

toluene and CHCl_3).....155

Figure 5-13. The film PL spectra of x % **PhFBT** in **MADN** at ~100 K.....155

List of Tables

	Page
Table 2-1. The EL Performance of Non-Doped Host-Emitting Red OLEDs recently.....	22
Table 2-2. Optical and thermal properties of red emitting fluorenes.....	35
Table 2-3. Characteristics of OLEDs containing pTFDCV , pTSPDCV , and PhSPDCV	37
Table 3-1. Fluorescence and absorption data of 2,2'-bisdonor-7,7'-bisacceptor-substituted 9,9'-spirobifluorenes.....	69
Table 3-2. Thermal properties of spirobifluorene compounds.....	71
Table 3-3. Calculated ground state dipole moments and differences in permanent dipole moments of the first excited state and ground state.....	77
Table 3-4. Absorption and fluorescence properties.....	78
Table 3-5. Solution and solid state photoluminescence quantum yield of six 9,9'-spirobifluorene fluorophores.....	81
Table 3-6. Energy levels of these six spirobifluorene compounds.....	85
Table 3-7. Characteristics of dopant and non-dopant OLEDs of PhSPDCV , BisPhSPDCV	87
Table 3-8. Characteristics of non-dopant OLEDs of PhSPCHO , BisPhSPCHO , PhSPDPV , and BisPhSPDPV	93
Table 4-1. Thermal properties of PhSPDPV and PhdiazaSPDPV	114
Table 4-2. Optical properties as well as energy levels of PhSPDPV and PhSP_{N2}DPV	115
Table 4-3. Characteristics of non-dopant OLEDs of PhSPDPV and PhSP_{N2}DPV	117
Table 4-4. Characteristics of non-dopant OLEDs of PhSPDPV and PhSP_{N2}DPV	120

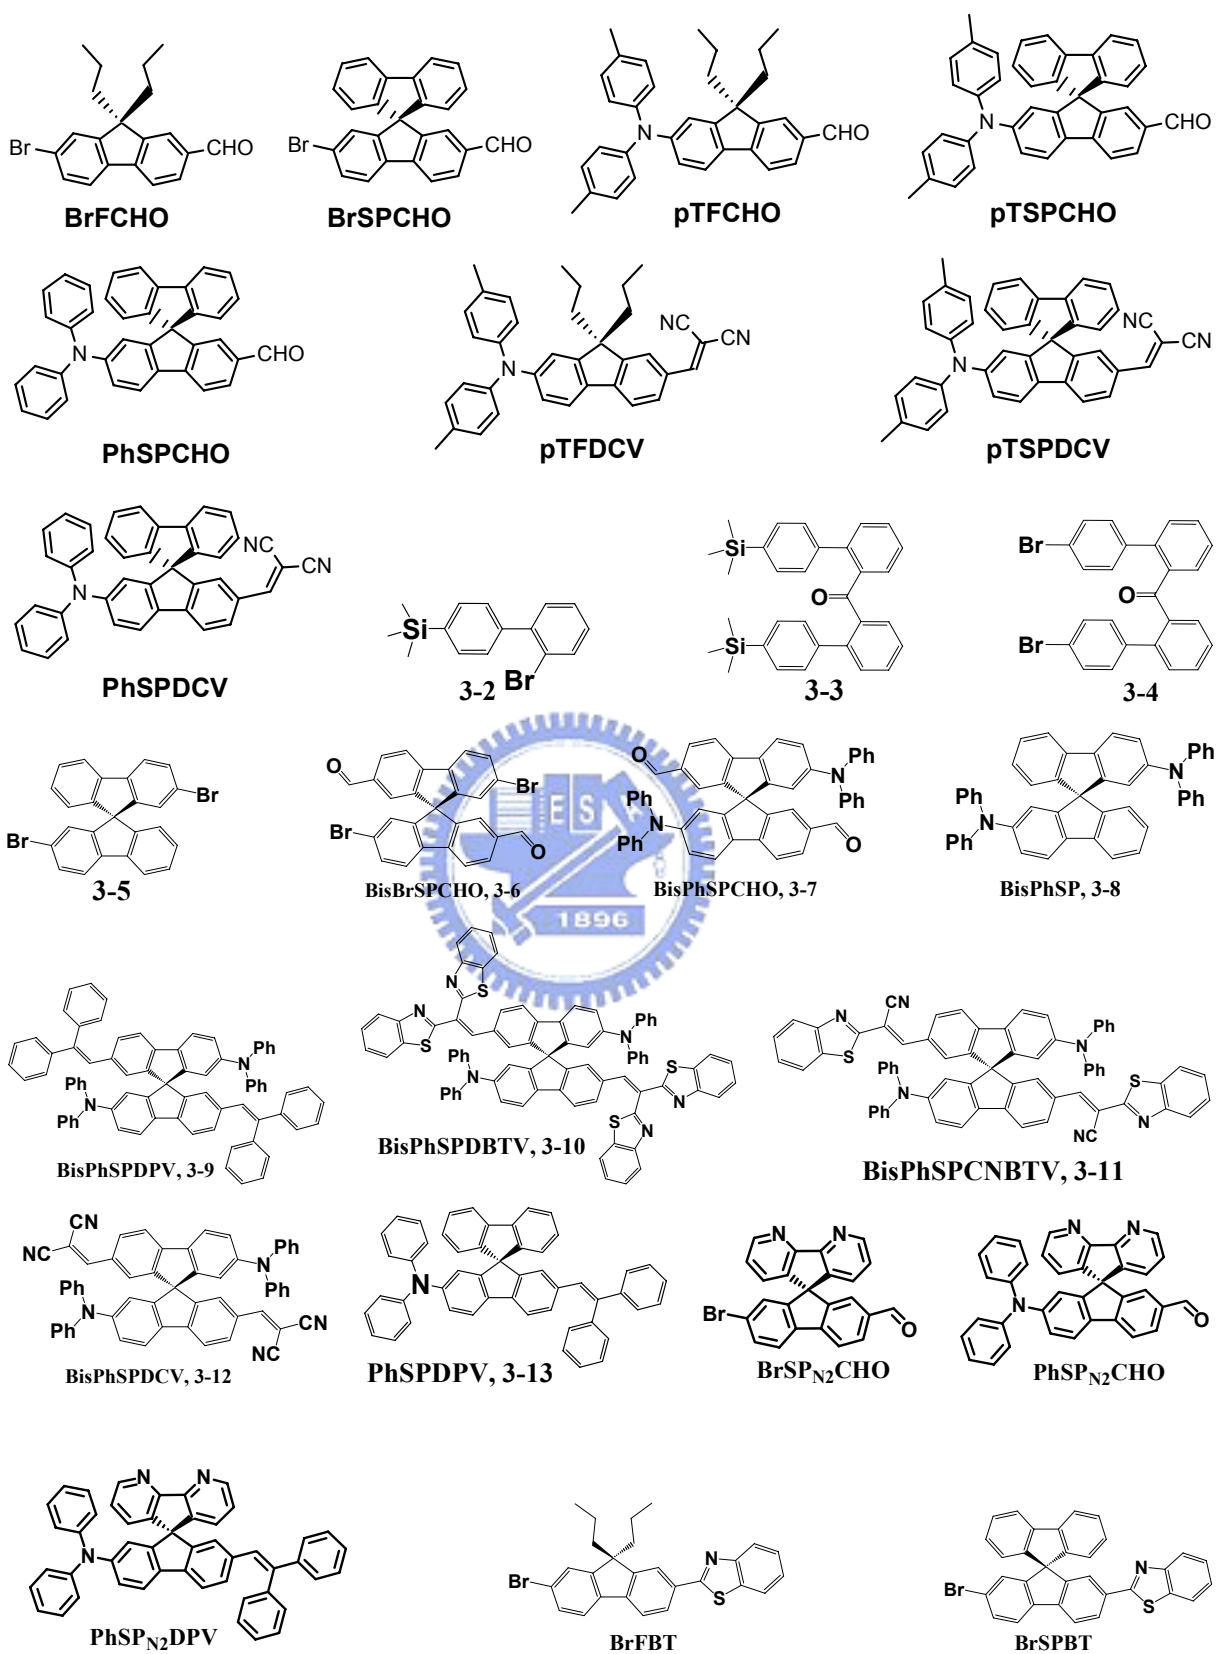

Table 5-1. Optical properties and energy levels of fluorene and spirobifluorene compounds.....148

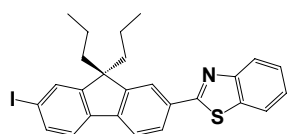

Table 5-2. Characteristics of OLEDs containing **oFPhFBT**.....148

Table 5-3. Characteristics of OLEDs containing **PhFBT**.....152
