

Fig. 3-1 The average grain size distribution of different laser frequency with pre treatment clean of HF+O₃ after excimer laser irradiation with different laser energy density at room temperature.

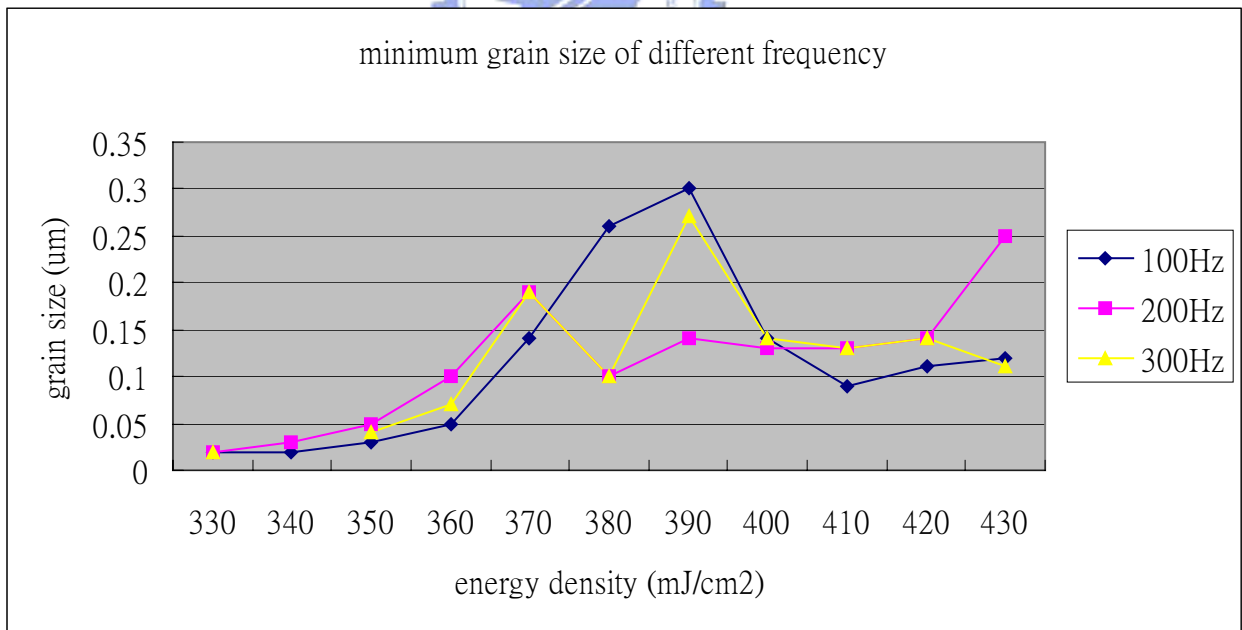

Fig. 3-2 The minimum grain size distribution of different laser frequency with pre treatment clean of HF+O₃ after excimer laser irradiation with different laser energy density at room temperature.

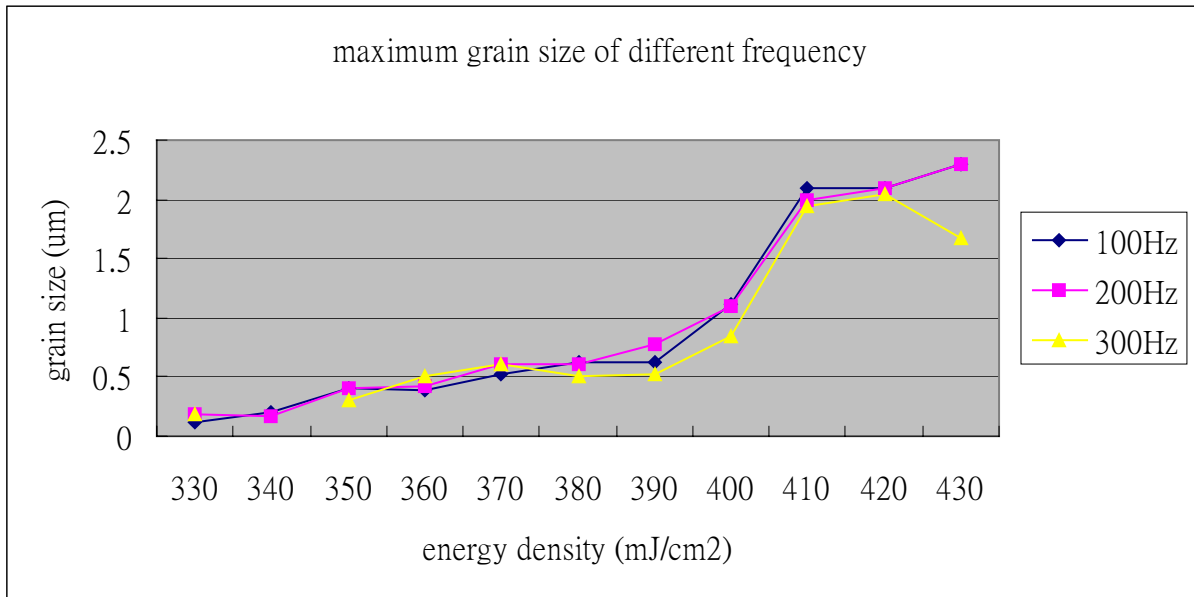

Fig. 3-3 The maximum grain size distribution of different laser frequency with pre treatment clean of HF+O₃ after excimer laser irradiation with different laser energy density at room temperature.
