

針對即時傳輸特性之 MAC 層資源分配方法

研究生：呂宗奇

指導教授：

黃經堯 博士

國立交通大學電子工程學系 電子研究所碩士班

摘要

由 IEEE 802.15.3 工作小組所制定的超寬頻標準(Ultra Wide Band)是現今熱門的標準之一，主要目標為在短距離內支援高速高品質的影音傳輸。為了要對高品質影音傳輸提供更好的 QoS (quality of service) 支援，並且為高速網路內不同類別的傳輸提供精準的傳輸順位設定，我們提出了一個以傳統 EDF 排程方法為基礎所修改的新排程演算法。本演算法根據各個傳輸連結到達 MAC 層的封包大小以及所要求的傳輸速率來調整此封包的傳輸期限(deadline)，對於同一個傳輸來說，此方法針對了各個傳輸的特性來提供精確的資源分配；對於不同傳輸來說，此方法也提供了不同的順位控制。另外，我們也提出了傳輸辨識器(traffic identifier)的架構來辨別個別傳輸的真正 QoS 需求。最後，為了要實現新演算法，我們修改了 802.15.3 標準中的架構。模擬結果顯示我們的新演算法和傳統的方法比較後，不但在我們所設定的高順位類型的傳輸模擬中有比較好的結果，對於低順位類型的傳輸，也有相同甚至更好的結果。最難得的是，我們所提出的方法相當簡單而且實用。

Priority-Based EDF Scheduling Algorithm for Real-time Service

Abstract

The Ultra Wide Band (UWB) standard developed by IEEE 802.15.3 task group is one of the popular candidates to achieve the goal of short range connection and high quality video/audio wireless transmission. In order to provide better QoS support for high quality multimedia applications and precise priority setting for various traffic types in high-data-rate wireless networks, a priority-based EDF scheduling algorithm is proposed. By adjusting each traffic's deadline according to the frame size and required transmission rate, our proposed algorithm may provide precise resources for the same application according to traffic characteristics and different priority controls of different applications. At the same time, the traffic identifier is proposed. The main goal of the traffic identifier is to identify true QoS requirements. Finally we modified the MAC header and the superframe structure of standard MAC protocol in order to implement the proposed algorithm. Simulation results show that the proposed algorithm can not only guarantee a low error rate for high priority traffic, but also work better than other algorithms on low priority traffic. Most importantly, the proposed algorithm and modified MAC protocol are simple and realistic.

誌 謝

碩士班兩年的時光匆匆，在新竹求學的七年時間將畫下句點。尤其在碩士班的兩年半當中，有很多人跟我因為緣分而相遇，更是我需要去感謝的貴人。也感謝老天讓我如此幸運的遇見你們，一起陪伴著我度過這段難忘的時光。

首先，我要感謝黃經堯老師，除了在專業上教授了許多無線通訊相關的核心知識，也讓我從只會讀書的大學生，學習如何發掘重要的問題、細心的分析問題、最後解決問題。此外，在做研究的過中，老師就有如一盞明燈，不時的指引我朝向正確的方向，也鼓勵我要從挫折中振作起來。感謝老師在百忙之中抽空，給予我在研究和寫作上的指導，我才能順利地完成這篇論文。

另外要感謝的，就是在實驗室的日子裡，一起共同努力的學長及伙伴們，振坤學長、振哲學長、宜霖學長、明原學長、彥翔學長、宜鍵學長、雲懷學長、正達學長、裕隆學長、建銘學長、大瑜學長、勇嵐學長、盟翔、鴻輝、昌叡、域晨及學弟們。有了你們的陪伴，使我的研究生活能多采多姿，這份心中的感動，一定是我畢生難忘的回憶。

最後，我要感謝我的家人，爸爸、媽媽、弟弟及明純師母。當我遇到瓶頸和困難時，總是可以感受到來自於你們的關心及祝福，不斷的支持鼓勵我，讓我心中時時充滿著溫暖及感恩。

在此，謹以我的畢業論文獻給大家，希望你們能分享我的成果與喜悅，感謝你們。

呂宗奇 謹誌
