中文摘要	i	
英文摘要	iii	
謝誌	v	
目錄	vi	
Scheme 目錄	x	
圖目錄	xi	
表目錄	xvii	
第一章	緒論	1
1.1	液晶簡介	1
1.1.1	液晶的起源	1
1.1.2	液晶之分類	2
1.1.3	小分子液晶分子	2
1.1.4	高分子型液晶材料	4
1.1.4.1	主鏈型高分子液晶材料	4
1.1.4.2	側鏈型高分子液晶材料	4
1.1.4.3	複合型高分子液晶材料	5
1.1.5	熱向性液晶之分類	5
1.1.5.1	向列型液晶	5
1.1.5.2	層列型液晶	6
1.1.5.3	膽固醇型液晶	7
1.1.5.4	碟狀液晶	8

1.1.6	液晶顯示器的顯示原理	8
1.2	有機電激發光簡介	10
1.2.1	有機電激發光的起源	10
1.2.2	電激發光原理	13
1.2.3	高分子發光二極體材料簡介	18
1.3	偏極化的高分子發光二極體	21
1.3.1	機械拉伸	22
1.3.2	定向摩擦	24
1.3.3	Langmuir-Blodgett (LB) Deposition	27
1.3.4	液晶分子自組裝	29
1.4	研究動機	37
第二章	實驗部份	39
2.1	試藥	39
2.2	測試儀器	39
2.2.1	核磁共振光譜儀	39
2.2.2	偏光顯微鏡	39
2.2.3	微差掃描卡計	40
2.2.4	熱重分析儀	40
2.2.5	凝膠滲透層析儀	40
2.2.6	紫外線可見光譜儀	40
2.2.7	螢光光譜儀	41
2.2.8	循環伏安計量法	41
2.2.9	OLED 元件亮度的量測	41
2.3	小分子與高分子液晶材料的合成	42
2.3.1	小分子液晶材料(M1-M5)之合成	42
2.3.2	側鏈高分子液晶材料(P1-P2)之合成	44
2.3.3	主鏈高分子液晶材料(PF1-PF10)之合成	52

2.3.4	主鏈高分子液晶材料(PPV1-PPV4)之合成	65
第三章	結果與討論	75
3.1	小分子液晶材料 M1-M5 之性質分析	75
3.1.1	小分子液晶材料 M1-M5 之合成	75
3.1.2	小分子液晶材料 M1-M5 之熱性質	75
3.1.3	偏極化之光學性質	78
3.1.3.1	配向層的製作	78
3.1.3.2	配向的發光層 M1-M5 製作	79
3.1.3.3	小分子液晶材料 M1-M5 偏極化光學性質	79
3.2	側鏈液晶高分子 P1-P2 之性質分析	83
3.2.1	高分子 P1-P2 之合成	83
3.2.2	高分子 P1-P2 之熱性質	83
3.2.3	偏極化之光學性質	85
3.2.3.1	製備偏極化之高分子薄膜	85
3.2.3.2	高分子 P1-P2 之偏極化光學性質	86
3.2.4	高分子 P1-P2 之偏極化電機發光元件	88
3.2.4.1	ITO pattern 的製作	88
3.2.4.2	元件架構介紹	89
3.2.4.3	偏極化電激發光之量測	90
3.3	主鏈液晶高分子 PF1-PF3 之性質分析	93
3.3.1	高分子 PF1-PF3 之合成	93
3.3.2	高分子 PF1-PF3 的熱性質	95
3.3.3	高分子 PF1-PF3 之偏極化光學性質	97
3.3.4	高分子 PF1-PF3 之電化學性質	101
3.3.5	偏極化電激發光元件	104
3.3.6	偏極化白光元件	111
3.4	主鏈液晶高分子 PF4-PF10 之性質分析	113

3.4.1	高分子 PF4-PF10 之合成	113
3.4.2	高分子 PF4-PF10 的熱性質	113
3.4.3	升溫 XRD 之量測	118
3.4.4	高分子 PF4-PF10 之偏極化光學性質	119
3.4.5	高分子 PF4-PF10 之電化學性質	125
3.4.6	高分子 PF4-PF10 之偏極化電激發光元件	127
3.4.7	偏極化白光元件製作與量測	134
3.5	主鏈液晶高分子 PPV1-PPV4 之性質分析	136
3.5.1	高分子 PPV1-PPV4 之合成	136
3.5.2	高分子 PPV1-PPV4 的熱性質	137
3.5.3	升溫 XRD 之量測	139
3.5.4	高分子 PPV1-PPV4 之偏極化光學性質	140
3.5.5	高分子 PPV1-PPV4 電化學性質	144
3.5.6	偏極化電激發光元件	144
第四章	結論	147
第五章	參考文獻	149
著作表		156

Schemes 目錄

Scheme 1	Synthesis of liquid crystal materials M1-M5	67
Scheme 2	Synthesis of liquid crystalline polymer P1	68
Scheme 3	Synthesis of liquid crystalline polymer P2	69
Scheme 4	Synthesis of monomers M8-M12	70
Scheme 5	Synthesis of monomers M13 and Model-LC	71
Scheme 6	Synthesis of monomers M14	72
Scheme 7	Synthesis of liquid crystalline polymer PF1-PF10	73
Scheme 8	Synthesis of liquid crystalline polymer PPV1-PPV4	74

圖 目 錄

Fig. 1.1	The kinds of liquid crystalline polymers	5
Fig. 1.2	Alignment structure of nematic liquid crystal.....	6
Fig. 1.3	Alignment structure of smectic liquid crystal.....	6
Fig. 1.4	Relative molecular alignment structures of smectic liquid crystal	7
Fig. 1.5	Alignment structure of cholesteric liquid crystal.....	7
Fig. 1.6	Alignment structure of discotic liquid crystal.....	8
Fig. 1.7	The structure of TN liquid crystal cell.....	9
Fig. 1.8	Small molecular OEL device prepared by Tang et al.....	12
Fig. 1.9	Structures of some common polymer materials.....	12
Fig. 1.10	The structure of single-layer type OLED device.....	14
Fig. 1.11	Band diagram of excitation formation in EL.....	15
Fig. 1.12	Energy diagram of excitation formation in EL.....	15
Fig. 1.13	Schematic energy-level diagram for an ITO/PPV/Al device.....	16
Fig. 1.14	PPV derivatives and their emission color range.....	19
Fig. 1.15	Poly(alkylthiophene) derivatives and their emission color range.....	19
Fig. 1.16	Examples of blue-emitting materials.....	20
Fig. 1.17	Examples of copolymers materials.....	20
Fig. 1-18	Polymers aligned by mechanical stretching.....	23
Fig. 1-19	Polymers aligned by rubbing	25
Fig. 1-20	Conjugated polymers with side chain LCs	26

Fig. 1-21	DP-PPV polymers with side chain LCs	26
Fig. 1-22	Langmuir-Blodgett film	28
Fig. 1-23	The structure of poly(2,5-diisopentoxy- <i>p</i> -phenylene vinylene)	28
Fig. 1-24	Polymers aligned by liquid-crystalline self-organization	30
Fig. 1-25	Structures of conjugated liquid crystalline polymers.....	31
Fig. 1-26	Structures of the main polymer with arylenevinylene segments	32
Fig. 1-27	Structures of PF2/6、PI and ST638.....	34
Fig. 1-28	Structures of photoalignment and liquid crystal material.....	34
Fig. 1-29	Structures of liquid crystal materials	35
Fig. 1-30	Structures of side chain liquid crystalline polymer.....	35
Fig. 1-31	Structures of photoalignment and liquid crystal material.....	36
Fig. 3-1	DSC thermogram of monomer M2	76
Fig. 3-2	Optical polarizing micrograph of monomer M2 at 75°C.....	77
Fig. 3-3	The instrument for measuring polarized UV light.	81
Fig. 3-4	Polarized UV-visible absorption spectra of M2 . (//: rubbing direction parallel to the polarizer, \perp : rubbing direction perpendicular to the polarizer.)	82
Fig. 3-5	Polarized PL emission spectra of M2	82
Fig. 3-6	DSC thermogram of polymer P1 : (A) second heating scan, (B) first cooling scan.	84
Fig. 3-7	Polarizing optical micrograph of polymer P1 : nematic droplet texture obtained.....	85
Fig. 3-8	Polarized UV-vis absorption spectra and PL emission of P1	87
Fig. 3-9	The instrument for measuring polarized EL light.....	90
Fig. 3-10	Polarized EL spectra of P2 in the ITO/rubbed-PEDOT/ P2 /Ca/Al	

device.....	92
Fig. 3-11 J-V(\square) and L-V(\bullet) curves of PF2	92
Fig. 3-12 The mechanism of Suzuki coupling.....	94
Fig. 3-13 TGA thermogram of polymer PF1	96
Fig. 3-14 DSC thermogram of polymer PF1	96
Fig. 3-15 Polarizing optical micrograph of polymer PF1 at 175°C	97
Fig. 3-16 Polarized UV-vis absorption spectra and PL emission of PF1	99
Fig. 3-17 Polarized UV-vis absorption spectra and PL emission of PF2	100
Fig. 3-18 Polarized UV-vis absorption spectra and PL emission of PF3	100
Fig. 3-19 Absorption and emission spectra of PF1 and PF2	101
Fig. 3-20 Cyclic voltammetry curve of PF1-PF3	103
Fig. 3-21 Relative energy levels of polymers PF1-PF3	103
Fig. 3-22 Polarized EL spectra of PF1 in the ITO/aligned PEDOT/ PF1 /Ca/Al device.....	106
Fig. 3-23 J-V(\square) and L-V(\bullet) curves of PF1 in the ITO/aligned PEDOT/ PF1 / Ca/Al device.....	106
Fig. 3-24 Polarized EL spectra of PF2 in the ITO/aligned PEDOT/ PF2 /Ca/Al device.....	107
Fig. 3-25 J-V(\square) and L-V(\bullet) curves of PF2 in the ITO/aligned PEDOT/ PF2 / Ca/Al device.....	107
Fig. 3-26 Polarized EL spectra of PF3 in the ITO/aligned PEDOT/ PF3 /Ca/Al device.....	108
Fig. 3-27 J-V(\square) and L-V(\bullet) curves of PF3 in the ITO/aligned PEDOT/ PF3 / Ca/Al device.....	108
Fig. 3-28 Polarized EL spectra of PF1+PF2(5%) in the ITO/aligned PEDOT/ PF1+PF2(5%) /Ca/Al device.....	109

Fig. 3-29	J-V(\square) and L-V(\bullet) curves of PF1+PF2(5%) in the ITO/aligned PEDOT/ PF1+PF2(5%) /Ca/Al device.....	109
Fig. 3-30	Polarized EL spectra of PF1+PF3(5%) in the ITO/aligned PEDOT / PF1+PF3(5%) /Ca/Al device.....	110
Fig. 3-31	J-V(\square) and L-V(\bullet) curves of PF1+PF3(5%) in the ITO/aligned PEDOT/ PF1+PF3(5%) /Ca/Al device.....	110
Fig. 3-32	Polarized EL spectra of device A in the ITO/aligned PEDOT/ polymer PF1+PF2+PF3 /Ca/Al device.....	112
Fig. 3-33	J-V(\square) and L-V(\bullet) curves of device A in the ITO/aligned PEDOT/polymer PF1+PF2+PF3 /Ca/Al device.....	112
Fig. 3-34	TGA thermogram of polymer PF6-PF8	116
Fig. 3-35	TGA thermogram of polymer PF8	116
Fig. 3-36	Polarizing optical micrograph of polymer PF8 at 150°C.....	117
Fig. 3-37	Polarizing optical micrograph of polymer Model-LC at 170°C... ..	117
Fig. 3-38	High temperature XRD profiles of PF9 film during stepwise increase in temperature.....	118
Fig. 3-39	Polarized UV-vis absorption spectra and polarized PL emission spectra of PF4	121
Fig. 3-40	Polarized UV-vis absorption spectra and polarized PL emission spectra of PF6	123
Fig. 3-41	Polarized PL emission spectra of PF9	123
Fig. 3-42	Polarized PL emission spectra of PF10	124
Fig. 3-43	Absorption and emission spectra of Model-LC and PF9	124
Fig. 3-44	Cyclic voltammetry curve of PF6	125
Fig. 3-45	Cyclic voltammetry curve of PF9	126
Fig. 3-46	Cyclic voltammetry curve of PF1-PF3	126

Fig. 3-47	Relative energy levels of polymers PF1-PF3	127
Fig. 3-48	Polarized EL spectra of PF4 in the ITO/aligned PEDOT/ PF4 /Ca/Al device.....	130
Fig. 3-49	J-V(\square) and L-V(\bullet) curves of PF4 in the ITO/aligned PEDOT/ PF4 / Ca/Al device.....	130
Fig. 3-50	Polarized EL spectra of PF6 in the ITO/aligned PEDOT/ PF6 /Ca/Al device.....	131
Fig. 3-51	J-V(\square) and L-V(\bullet) curves of PF6 in the ITO/aligned PEDOT/ PF6 / Ca/Al device.....	131
Fig. 3-52	Polarized EL spectra of PF9 in the ITO/aligned PEDOT/ PF9 /Ca/Al device.....	132
Fig. 3-53	J-V(\square) and L-V(\bullet) curves of PF9 in the ITO/aligned PEDOT/ PF9 /Ca/Al device.....	132
Fig. 3-54	Polarized EL spectra of PF10 in the ITO/aligned PEDOT/ PF10 /Ca/Al device.....	133
Fig. 3-55	J-V(\square) and L-V(\bullet) curves of PF10 in the ITO/aligned PEDOT/ PF10 /Ca/Al device.....	133
Fig. 3-56	Polarized EL spectra of device D in the ITO/aligned PEDOT/ polymer PF7+PF9+PF10 /Ca/Al device.....	135
Fig. 3-57	J-V(\square) and L-V(\bullet) curves of device D in the ITO/aligned PEDOT/polymer PF7+PF9+PF10 /Ca/Al device.....	135
Fig. 3-58	TGA thermogram of polymer PPV1-PPV4	138
Fig. 3-59	DSC thermogram of polymer PPV1	138
Fig. 3-60	Polarizing optical micrograph of polymer PPV1 at 150°C.....	139
Fig. 3-61	High temperature XRD profiles of PPV1 film during stepwise increase in temperature.....	140
Fig. 3-62	Polarized UV-vis absorption spectra of PPV1	143

Fig. 3-63	Polarized PL emission spectra of PPV1	143
Fig. 3-64	Relative energy levels of polymers PPV1-PPV4	144
Fig. 3-65	Polarized EL spectra of PPV4 in the ITO/aligned PEDOT/ PPV4 /Ca/Al device.....	146
Fig. 3-66	J-V(\square) and L-V(\bullet) curves of PPV4 in the ITO/aligned PEDOT/ PPV4/ Ca/Al device.....	146
