

## LIST OF FIGURES

Fig. 2.1 The phase portraits and the bifurcation diagram for double Ikeda system with order $q_1 = 1$ and $q_2 = 1$ .....	8
Fig. 2.2 The phase portraits and the bifurcation diagram for double Ikeda system with order $q_1 = 0.9$ and $q_2 = 0.9$ .....	9
Fig. 2.3 The phase portraits and the bifurcation diagram for double Ikeda system with order $q_1 = 0.8$ and $q_2 = 0.8$ .....	10
Fig. 2.4 The phase portraits and the bifurcation diagram for double Ikeda system with order $q_1 = 0.7$ and $q_2 = 0.7$ .....	11
Fig. 2.5 The phase portraits and the bifurcation diagram for double Ikeda system with order $q_1 = 0.6$ and $q_2 = 0.6$ .....	12
Fig. 2.6 The phase portraits and the bifurcation diagram for double Ikeda system with order $q_1 = 0.5$ and $q_2 = 0.5$ .....	13
Fig. 2.7 The phase portraits and the bifurcation diagram for double Ikeda system with order $q_1 = 0.4$ and $q_2 = 0.4$ .....	14
Fig. 2.8 The phase portraits and the bifurcation diagram for double Ikeda system with order $q_1 = 0.3$ and $q_2 = 0.3$ .....	15
Fig. 2.9 The phase portraits and the bifurcation diagram for double Ikeda system with order $q_1 = 0.2$ and $q_2 = 0.2$ .....	16
Fig. 2.10 The phase portraits and the bifurcation diagram for double Ikeda system with order $q_1 = 0.1$ and $q_2 = 0.1$ .....	17
Fig. 3.1 The phase portraits diagram for double Ikeda system. ....	23
Fig.3.2 (a) The time history of $x_1$ (blue) and $x_2$ (red), $y_1$ (blue) and $y_2$ (red) of double Ikeda systems with initial conditions in Table 3.1.....	24
Fig.3.2 (b) The time history of $x_1$ (blue) and $x_2$ (red), $y_1$ (blue) and $y_2$ (red) of double Ikeda systems with initial conditions in Table 3.1.....	25

Fig.3.3 (a) The time history of $x_1$ (blue) and $x_2$ (red), $y_1$ (blue) and $y_2$ (red) of double Ikeda systems with initial conditions in Table 3.2 .....	26
Fig.3.3 (b) The time history of $x_1$ (blue) and $x_2$ (red), $y_1$ (blue) and $y_2$ (red) of double Ikeda systems with initial conditions in Table 3.2 .....	27
Fig.3.3 (c) The time history of $-x_1$ (blue) and $x_2$ (red), $-y_1$ (blue) and $y_2$ (red) of double Ikeda systems with initial conditions in Table 3.2 .....	28
Fig. 4.1 (a) The phase portrait, the delay time $\tau_1$ of system (4.1) is replaced by $200 + x_2$ .....	32
Fig. 4.1 (b) The phase portrait, the original constant delay time is fixed .....	32
Fig. 4.1 (c) It is the magnified diagram of Fig.4.1 (a). ....	32
Fig. 4.2 The phase portrait, the delay time $\tau_2$ of system (4.1) is replaced by $200 + x_2$ .....	32
Fig. 4.3 (a) The phase portrait, the delay time $\tau_1$ of system (4.1) is replaced by $200 + 0.5x_2$ .....	33
Fig. 4.3 (b) It is the magnified diagram of Fig.4.3 (a). ....	33
Fig. 4.4 The phase portrait, the delay time $\tau_2$ of system (4.1) is replaced by $200 + 0.5x_2$ .....	33
Fig. 4.5 (a) The phase portrait, the delay time $\tau_1$ of system (4.1) is replaced by $200 + 0.612x_2$ .....	34
Fig. 4.5 (b) It is the magnified diagram of Fig.5 (a). ....	34
Fig. 4.6 The phase portrait, the delay time $\tau_2$ of system (4.1) is replaced by $200 + 0.612x_2$ .....	34
Fig. 4.7 The time history when the delay time $\tau_2$ of system (4.1) is replaced by $200 + x_2$ .....	35
Fig. 4.8 The time history when the delay time $\tau_2$ of system (4.1) is replaced by $200 + 0.5x_2$ .....	35

Fig. 4.9 (a) The phase portrait, the delay time $\tau_1$ of system (4.1) is replaced by	
$200 + 0.612x_2$ .....	36
Fig. 4.9 (b) The phase portrait, the state is periodic.....	36
Fig. 4.9 (c) It is the magnified diagram of Fig.4.9 (a). .....	36
Fig. 4.10 The phase portrait, the delay time $\tau_2$ of system (4.1) is replaced by	
$200 + 0.612x_2$ .....	36
Fig. 4.11 (a) The phase portrait, the delay time $\tau_1$ of system (4.1) is replaced by	
$200 + 0.1y_2$ .....	37
Fig. 4.11 (b) It is the magnified diagram of Fig.4.11 (a). .....	37
Fig. 4.12 The phase portrait, the delay time $\tau_2$ of system (4.1) is replaced by	
$200 + 0.1y_2$ .....	37
Fig. 4.13 The time history, the delay time $\tau_2$ of system (4.1) is replaced by	
$200 + 0.1y_2$ .....	38
Fig. 5.1 The phase portraits for systems (5.1) and (5.2). .....	44
Fig. 5.2 (a) The phase portraits, $\tau_3=10$ . (b) The time histories of $x_1$ (blue) and $x_2$ (red), $\tau_3=10$ . (c) The time histories of $y_1$ (blue) and $y_2$ (red), $\tau_3=10$ .....	45
Fig. 5.3 (a) The phase portraits, $\tau_3=50$ . (b) The time histories of $x_1$ (blue) and $x_2$ (red), $\tau_3=50$ . (c) The time histories of $y_1$ (blue) and $y_2$ (red), $\tau_3=50$ . (d) Magnified diagram of (b). (e) Magnified diagram of (c).....	47
Fig. 5.4 (a) The phase portraits, $\tau_3=100$ . (b) The time histories of $x_1$ (blue) and $x_2$ (red), $\tau_3=100$ . (c) The time histories of $y_1$ (blue) and $y_2$ (red), $\tau_3=100$ . (d) Magnified diagram of (b). (e) Magnified diagram of (c).....	50
Fig. 5.5 The phase portraits, $\tau_3=100$ . .....	50

Fig. 5.6 (a) The phase portraits,  $\tau_3=10$  and  $k=1$ . (b) The time histories of  $x_1$  (blue) and  $x_2$  (red),  $\tau_3=10$  and  $k=1$ . (c) The time histories of  $y_1$  (blue) and  $y_2$  (red),  $\tau_3=10$  and  $k=1$  ..... 52

Fig. 5.7 (a) The phase portraits,  $\tau_3=10$  and  $k=50$ . (b) The time histories of  $x_1$  (blue) and  $x_2$  (red),  $\tau_3=10$  and  $k=50$ . (c) The time histories of  $y_1$  (blue) and  $y_2$  (red),  $\tau_3=10$  and  $k=50$  ..... 53

Fig. 5.8 (a) The phase portraits,  $\tau_3=10$  and  $k=1$ . (b) The time histories of  $x_1$  (blue) and  $x_2$  (red),  $\tau_3=10$  and  $k=1$ . (c) The time histories of  $y_1$  (blue) and  $y_2$  (red),  $\tau_3=10$  and  $k=1$  ..... 55

Fig. 5.9 (a) The phase portraits,  $\tau_3=10$  and  $k=30$ . (b) The time histories of  $x_1$  (blue) and  $x_2$  (red),  $\tau_3=10$  and  $k=30$ . (c) The time histories of  $y_1$  (blue) and  $y_2$  (red),  $\tau_3=10$  and  $k=30$  ..... 56
