Construction of form

There is no routine process in the construction of form.
Initial value and procedure effect the designing process and final result

Discuss : whole /unit/connection/city network / creation of atmosphere
first ... second ... main...auxiliary

Through the analyses of organization
Construct a complete logical procedure
From the social power hidden in the society network
To interpretation the derivation of structure.
From the characteristics of small unites to discuss the possibilities of connection
From the force between the unite of structure
To modeling the construction

Types of connection >Units>Social network>Whole>creation of atmosphere

Units from the pure texture of whole ideal
Modeling individually after abstracted the unite and modeling the whole module through the formula process of growth.
Through the connection of sections to form the space atmosphere

Whole>Social network>Unite status>Creation of atmosphere

Discussion of the relationship between the unequal fragments of construction
Vision intimate structure ,structure fragmentized into units
In the same procedure unite construct and texture create new symbol is structure

Unite status >creation of atmosphere >way of connection>whole>social network

Form social analysis to add the programs of green structure
Discussion of the formation of same unit through geographic culture textures
Through local relationship to construct whole landscape

Social network>Way of connection>Unite status>Creation of atmosphere>Whole

Extract the same core of the growth texture
Adding urban texture to form similar unite same way of connection
Through the force of hidden power in the society creation the city space with landscape

Unite status >Way of connection>Social network>Forming of atmosphere>Integral

形式的構成

建築形式的生成沒有絕對的過程
起頭及價值和著手的程序影響完成的結果

討論 整體/單元狀態/連結方式/都市脈絡/型塑氛圍
何者為先...何者為後...何者為主...何者為輔

藉由組織分析
建構完整的邏輯推演
從社會的隱含社會力量的脈絡
衍生詮釋建築結構狀態
由小單元個體的特性討論連結的可能性
構築單元間的力量去
型塑建築

單元依整體意涵的純化紋理
抽象轉化後個別型塑 及 單元統一型塑 依固定的方程模式生長
皆經斷落的連結 統整空間氛圍

討論量體與形體完全不等的碎化單元組構之關係
視覺模擬形體 形體碎化單元
而單元由相同工法與紋理構成 創造新符號建築

從都市分析的方向著手 融入實務的綠建築想法
討論相同單元經地理人文紋理的型塑
藉地方關係組構的整體地景

抽出相同模式生長的紋理精髓
注入都市紋理成不完全相同的類似單元 相同的連結方式
經都市隱形的潛在力量施加 成地景般的都市空間
