## Chapter 1 Introduction

|  |   |
|--|---|
| 1.1 Ti and Ti Alloy  |   |
| 1.1.1 Crystal Structure of Titanium  | 1 |
| 1.1.2 Phase Diagram.....   | 1 |
| 1.1.3 Casting of Titanium.....   | 2 |
| 1.2 Y <sub>2</sub> O <sub>3</sub> -ZrO <sub>2</sub> .....                          | 3 |
| 1.2.1 Phase Diagram.....   | 3 |
| 1.2.2 The <i>c</i> → <i>t</i> -ZrO <sub>2</sub> Diffusion Transformation.....      | 4 |
| 1.2.3 The <i>c</i> → <i>t'</i> -ZrO <sub>2</sub> Diffusionless Transformation..... | 4 |
| 1.3 Ti/ZrO <sub>2</sub> System.....  | 6 |
| 1.4 Thesis Outline.....  | 8 |
| References.....  | 9 |

## Chapter 2 Ti<sub>2</sub>ZrO Phases Formed in the Titanium and Zirconia Interface after Reaction at 1550°C

|                                  |    |
|----------------------------------|----|
| 2.1 Introduction.....            | 18 |
| 2.2 Experimental Procedures..... | 19 |
| 2.3 Results and Discussion.....  | 21 |
| 2.4 Conclusions.....             | 25 |
| References.....                  | 26 |

## Chapter 3

### Zirconia-Related Phases in the Zirconia/Titanium Diffusion Couple after Annealing at 1100° to 1550°C

|                                  |    |
|----------------------------------|----|
| 3.1 Introduction.....            | 35 |
| 3.2 Experimental Procedures..... | 37 |

|  |    |
|--|----|
| 3.3 Results and Discussion.....                          | 39 |
| 3.3.1 Annealing at 1100°C.....                           | 39 |
| 3.3.2 Annealing at 1300°C.....                           | 39 |
| 3.3.3 Annealing at 1550°C.....                           | 40 |
| 3.3.4 Proposed model of phase development at 1300°C..... | 45 |
| 3.3.4 Proposed model of phase development at 1550°C..... | 46 |
| 3.4 Conclusions.....                                     | 47 |
| References.....  | 47 |

## **Chapter 4**

### **Microstructural Evolution and Formation Mechanism of the Interface between Titanium and Zirconia Annealed at 1550°C**

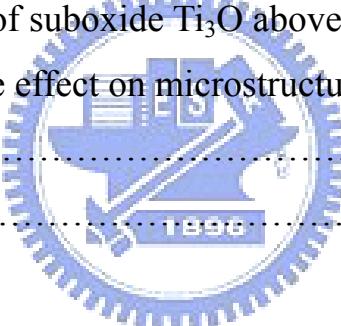

|   |    |
|---|----|
| 4.1 Introduction.....                                     | 59 |
| 4.2 Experimental Procedures.....                          | 60 |
| 4.3 Results and Discussion.....                           | 61 |
| 4.3.1 Formation Mechanism of Various Reaction Layers..... | 61 |
| 4.3.2 Proposed Model of Microstructural Evolution.....    | 69 |
| 4.4 Conclusions.....                                      | 72 |
| References.....   | 73 |

## **Chapter 5**

### **Temperature Dependence of the Interfacial Reaction between Titanium and Zirconia Annealed between 1100° and 1550°C**

|                       |    |
|-----------------------|----|
| 5.1 Introduction..... | 87 |
|-----------------------|----|

|  |     |
|--|-----|
| 5.2 Experimental Procedures.....                             | 88  |
| 5.2.1 Sample Preparation.....                                | 88  |
| 5.2.2 Sample Observation.....                                | 89  |
| 5.2.2.1 SEM/EDS analyses.....                                | 89  |
| 5.2.2.2 TEM/EDS analyses.....                                | 90  |
| 5.3 Results and Discussion.....                              | 90  |
| 5.3.1 Distinct microstructures at various temperatures.....  | 90  |
| 5.3.2 Variation in the reaction layer “I”.....               | 92  |
| 5.3.3 Formation of the reaction layer “II” at 1550°C.....    | 94  |
| 5.3.4 Variation of the reaction layer “III”.....             | 95  |
| 5.3.5 Variation in the reaction layer “V”.....               | 95  |
| 5.3.6 Variation in the reaction layer “VI”.....              | 96  |
| 5.3.7 Formation of suboxide $Ti_3O$ above 1400°C.....        | 97  |
| 5.3.8 Temperature effect on microstructural development..... | 100 |
| 5.4 Conclusions.....   | 103 |
| References.....  | 105 |

|  |     |
|--|-----|
| <b>Chapter 6 Summary.....</b>                                    | 119 |
| 6.1 Interface structures and reaction mechanisms at 1100°C ..... | 119 |
| 6.2 Interface structures and reaction mechanisms at 1300°C ..... | 120 |
| 6.3 Interface structures and reaction mechanisms at 1400°C ..... | 120 |
| 6.4 Interface structures and reaction mechanisms at 1550°C ..... | 121 |
