| <b>Abstract (in Chinese)</b> .....                      | I    |
| <b>Abstract (in English)</b> .....                      | III  |
| <b>Contents of Table</b> .....                          | VIII |
| <b>Contents of Figure</b> .....                         | X    |
| <b>1. Introduction</b> .....                            | 1    |
| 1.1. Background .....                                   | 2    |
| 1.2. Motivation .....                                   | 5    |
| Reference.....  | 6    |
| <b>2. Literature Review</b> .....                       | 8    |
| 2.1. Structure and properties of carbon nanotubes ..... | 8    |
| 2.1.1. Structure.....                                   | 8    |
| 2.1.2. Properties.....                                  | 10   |
| 2.1.2.1. Electrical properties.....                     | 10   |
| 2.1.2.2 Mechanical properties.....                      | 11   |
| 2.2. Fabrication of carbon nanotube.....                | 13   |
| 2.2.1. Arc discharge.....                               | 13   |
| 2.2.2. Laser ablation.....                              | 14   |
| 2.2.3. Chemical vapor deposition.....                   | 14   |
| 2.2.3.1. Thermal.....                                   | 15   |
| 2.2.3.2. MPCVD.....                                     | 16   |
| 2.3. Growth mechanisms of carbon nanotubes.....         | 17   |
| 2.3.1. Growth with catalyst.....                        | 17   |
| 2.3.1.1. Growth with catalyst.....                      | 17   |

|  |           |
|--|-----------|
| 2.3.1.2. Base-growth model and Tip-growth model.....                             | 17        |
| 2.3.2. Open-end and close end growth model.....                                  | 18        |
| 2.4. Field emission.....   | 19        |
| 2.4.1. Field emission theory.....  | 19        |
| 2.4.2. Parameter that effect the emission property of CNTs.....                  | 20        |
| 2.5. Field emission enhancement of carbon nanotube.....                          | 22        |
| Reference.....   | 27        |
| <b>3. Experimental Details.....</b>  | <b>30</b> |
| 3.1. Deposition system- Microwave plasma chemical<br>vapor deposition MPCVD..... | 30        |
| 3.2. Experiment procedure.....   | 32        |
| 3.3. Characterization and analysis of carbon nanotubes.....                      | 34        |
| 3.3.1 FE-SEM.....  | 34        |
| 3.3.2 Raman.....   | 34        |
| 3.2.3. HRTEM.....  | 35        |
| 3.2.4. I-V measurement.....  | 35        |
| Reference.....   | 37        |
| <b>4. Fabrication of carbon nanotubes.....</b>                                   | <b>38</b> |
| 4.1. Effect of pretreatment and growth temperature on the nanotube growth..      | 38        |
| 4.1.1. Experimental detail.....  | 38        |
| 4.1.2. Result and discussion.....  | 38        |
| 4.2. Effect of bias voltage.....   | 42        |
| 4.2.1. Experimental detail.....  | 42        |
| 4.2.2. Results and discussion.....   | 42        |
| 4.3. Effect of adding nitrogen and oxygen as assistant gases.....                | 47        |
| 4.3.1. Experimental detail.....  | 47        |

|  |           |
|--|-----------|
| 4.3.2. FEM.....  | 48        |
| 4.4. The effect of morphology on field emission property.....                        | 54        |
| 4.5. Conclusion.....   | 55        |
| Reference.....   | 56        |
| <b>5. Effect of treatment by laser irradiation on field emission properties.....</b> | <b>57</b> |
| 5.1. Introduction to post-treatment of CNT films.....                                | 57        |
| 5.2. Experimental detail.....  | 58        |
| 5.3. Results and discussion.....   | 60        |
| 5.3.1. Dependence of laser power density.....  | 60        |
| 5.3.1.1. Raman.....  | 60        |
| 5.3.1.2. FEM.....  | 61        |
| 5.3.2. Raman.....  | 63        |
| 5.3.3. Dependence on the atmosphere during irradiation.....                          | 66        |
| 5.3.3.1. Raman.....  | 67        |
| 5.3.3.2. FEM.....  | 68        |
| 5.4. The effect of defects on field emission property.....                           | 71        |
| 5.5. Conclusion.....   | 72        |
| Reference.....   | 73        |
| <b>6. Conclusion.....</b>  | <b>74</b> |
| 6.1. $I_D/I_G$ dependence on Turn-on field.....                                      | 74        |
| 6.2. $I_D/I_G$ dependence on Current density and Beta.....                           | 75        |
| 6.3. Summary.....  | 76        |
